

Аппарат искусственной вентиляции легких Т-образный Neo-Тее с ручным управлением с принадлежностями

Комплектация:

- 1) контур пациента– 1 шт.
- 2) контроллер – 1 шт.
- 3) лицевая маска для детей первого года жизни- 1 шт. .
- 4) разветвитель Т-образный с манометром 0-60 см вод.ст. – 1 шт.

Figure 1

CONNECTION TO HUT & BARB (for standard connection):

1. Connect connector adapter into connector.
2. Attach to the end of the barbs for the patient and the oxygen.

PATIENT CIRCUIT:

- Connect patient circuit to the connector.
- Connect PEEP valve to the connector.
- Connect the connector to the patient circuit.
- Connect the connector to the patient circuit.
- Connect the connector to the patient circuit.

SPECIFICATIONS:

1. Delivered Oxygen Concentration: 21% to 100%
2. Flowing pressure range: 0 to 40 cm H₂O
3. Dead Space: 5 ml
4. Flowing Resistance: 0.2 cm H₂O at minimum PEEP setting (0.5 LPM)
5. Inspiratory Resistance: 1.5 cm H₂O at minimum PEEP setting (0.5 LPM)
6. Gas flow range: 0.5 LPM to 15 LPM
7. Integral Patient Circuit Connector Assembly: 1.5 to 10 cm H₂O to 3 cm H₂O Greater than 10 cm H₂O to 5 cm H₂O
8. Maximum Pressure in Connector (dependent on flow rate): 40 cm H₂O to 5 cm H₂O (0.5 LPM to 15 LPM)
9. Operating time (at 0.5 LPM) (0.5 LPM to 15 LPM): 40 minutes
10. External Dimensions: 100 mm (4") x 100 mm (4") x 100 mm (4")
11. Weight: 83 g
12. Storage Temperature Range: -40°C to +40°C up to 95% humidity
13. Operating Temperature Range: -10°C to +30°C up to 95% humidity
14. Patient Connections: ISO 5956-1 - 15 mm taper barbs
15. Material with fittings that meet CSA 1240 Oxygen DSCS standard
16. Gas Delivery Pressures: Peak inspiratory pressure (PIP) 0 to 40 cm H₂O Positive End-Expiratory Pressure (PEEP) range of 0 to 15 cm H₂O up to approximately 2 cm H₂O 0.5 LPM up to approximately 4 cm H₂O 1.5 LPM up to approximately 6 cm H₂O 3 LPM up to approximately 8 cm H₂O 5 LPM up to approximately 10 cm H₂O 10 LPM up to approximately 15 cm H₂O

Mercury Medical
T-Piece Resuscitator
INDICATIONS FOR USE:
The T-Piece Resuscitator is used for the delivery of positive pressure ventilation to patients who are unable to breathe on their own.
CAUTIONS:
1. Do not use the T-Piece Resuscitator on patients with facial trauma or other conditions that may prevent a proper seal.
2. Do not use the T-Piece Resuscitator on patients with a known or suspected airway obstruction.
3. Do not use the T-Piece Resuscitator on patients with a known or suspected pneumothorax.
4. Do not use the T-Piece Resuscitator on patients with a known or suspected tension pneumothorax.
5. Do not use the T-Piece Resuscitator on patients with a known or suspected hemothorax.
6. Do not use the T-Piece Resuscitator on patients with a known or suspected rib fracture.
7. Do not use the T-Piece Resuscitator on patients with a known or suspected flail chest.
8. Do not use the T-Piece Resuscitator on patients with a known or suspected diaphragmatic hernia.
9. Do not use the T-Piece Resuscitator on patients with a known or suspected abdominal injury.
10. Do not use the T-Piece Resuscitator on patients with a known or suspected pelvic injury.
11. Do not use the T-Piece Resuscitator on patients with a known or suspected spinal injury.
12. Do not use the T-Piece Resuscitator on patients with a known or suspected head injury.
13. Do not use the T-Piece Resuscitator on patients with a known or suspected brain injury.
14. Do not use the T-Piece Resuscitator on patients with a known or suspected intracranial hemorrhage.
15. Do not use the T-Piece Resuscitator on patients with a known or suspected subarachnoid hemorrhage.
16. Do not use the T-Piece Resuscitator on patients with a known or suspected aneurysm.
17. Do not use the T-Piece Resuscitator on patients with a known or suspected stroke.
18. Do not use the T-Piece Resuscitator on patients with a known or suspected seizure.
19. Do not use the T-Piece Resuscitator on patients with a known or suspected arrhythmia.
20. Do not use the T-Piece Resuscitator on patients with a known or suspected heart failure.
21. Do not use the T-Piece Resuscitator on patients with a known or suspected pulmonary hypertension.
22. Do not use the T-Piece Resuscitator on patients with a known or suspected pulmonary embolism.
23. Do not use the T-Piece Resuscitator on patients with a known or suspected deep vein thrombosis.
24. Do not use the T-Piece Resuscitator on patients with a known or suspected blood clot.
25. Do not use the T-Piece Resuscitator on patients with a known or suspected infection.
26. Do not use the T-Piece Resuscitator on patients with a known or suspected fever.
27. Do not use the T-Piece Resuscitator on patients with a known or suspected hypothermia.
28. Do not use the T-Piece Resuscitator on patients with a known or suspected hyperthermia.
29. Do not use the T-Piece Resuscitator on patients with a known or suspected dehydration.
30. Do not use the T-Piece Resuscitator on patients with a known or suspected fluid overload.
31. Do not use the T-Piece Resuscitator on patients with a known or suspected electrolyte imbalance.
32. Do not use the T-Piece Resuscitator on patients with a known or suspected acid-base imbalance.
33. Do not use the T-Piece Resuscitator on patients with a known or suspected coagulopathy.
34. Do not use the T-Piece Resuscitator on patients with a known or suspected bleeding disorder.
35. Do not use the T-Piece Resuscitator on patients with a known or suspected thrombocytopenia.
36. Do not use the T-Piece Resuscitator on patients with a known or suspected platelet dysfunction.
37. Do not use the T-Piece Resuscitator on patients with a known or suspected liver failure.
38. Do not use the T-Piece Resuscitator on patients with a known or suspected kidney failure.
39. Do not use the T-Piece Resuscitator on patients with a known or suspected multi-organ dysfunction syndrome.
40. Do not use the T-Piece Resuscitator on patients with a known or suspected sepsis.
41. Do not use the T-Piece Resuscitator on patients with a known or suspected shock.
42. Do not use the T-Piece Resuscitator on patients with a known or suspected hypotension.
43. Do not use the T-Piece Resuscitator on patients with a known or suspected tachycardia.
44. Do not use the T-Piece Resuscitator on patients with a known or suspected bradycardia.
45. Do not use the T-Piece Resuscitator on patients with a known or suspected arrhythmia.
46. Do not use the T-Piece Resuscitator on patients with a known or suspected heart block.
47. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
48. Do not use the T-Piece Resuscitator on patients with a known or suspected left bundle branch block.
49. Do not use the T-Piece Resuscitator on patients with a known or suspected right bundle branch block.
50. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
51. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
52. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
53. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
54. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
55. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
56. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
57. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
58. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
59. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
60. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
61. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
62. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
63. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
64. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
65. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
66. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
67. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
68. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
69. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
70. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
71. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
72. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
73. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
74. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
75. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
76. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
77. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
78. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
79. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
80. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
81. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
82. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
83. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
84. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
85. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
86. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
87. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
88. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
89. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
90. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
91. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
92. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
93. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
94. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
95. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
96. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
97. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
98. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
99. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
100. Do not use the T-Piece Resuscitator on patients with a known or suspected bundle branch block.
