ResolutionMD 5.1 Android

Indications for Use and Regulatory Status

Product: ResolutionMD® Mobile

Version: 5.1

Indications for Use

ResolutionMD® Mobile is a software-based Picture Archiving and Communication System (PACS) used with general purpose computing servers and specific mobile devices. It provides for communication, storage, reformatting, rendering on the server component and communication and display of DICOM 3.0-compliant medical images.

ResolutionMD Mobile is intended for use as a diagnostic, review and analysis tool by trained professionals such as radiologists, physicians and technologists. When interpreted by a trained physician, reviewed images may be used as an element for diagnosis. This device is not intended to replace full workstations and should be used only when there is no access to a workstation.

ResolutionMD Mobile is not to be used for mammography.
