INSTRUCTIONS FOR USE

DEVICE DESCRIPTION

The TrailBlazer™ Support Catheter is a single lumen, 5F catheter with a 65 cm length. The catheter is made of polyurethane and has a soft, flexible tip. The catheter is used for the drainage of urine from the bladder into a collection bag.

PREPARATION OF DEVICE

CATHETER: Carefully inspect the package and catheter prior to use. Do not use the catheter if the package is damaged or if the catheter is bent, kinked, or otherwise damaged.

TO DISPLACE AIR

1. Connect a 100 cc syringe to the proximal end of the catheter. Aspirate the catheter until the syringe is empty. Repeat this process until the catheter is free of air.

DEVICE USE

1. Insert the catheter into the bladder through the urethra. Advance the catheter until urine is seen in the collection bag. Refer to product labeling.
