INTRACULAR LENS-DEVICE DESCRIPTION: The "Matrix Acrylic®" UV-Absorbing Polymer Chamber Intracocular Implant is a premium grade optical device, designed for capsular bag implantation. The optical system is consistent with straight edges and made from high refractive index UV absorbing hydrophobic Acrylic and has the capability of hiding folds. The "Matrix Acrylic®" Acrylic is Photochromic in nature and this property is activated only under the presence of UV light, under which the lens becomes yellow in color and hence
