ZIPwire™

Hydrophilic Guide Wire

Standard
Type

ZIPwire™ Wire with Hydrophilic Coating: This wire is designed for use in minimally invasive procedures. It is made of a soft, flexible, hydrophilic material that allows it to be easily inserted into the body. The wire is designed to be used in a variety of procedures, including minimally invasive surgery, minimally invasive cardiac catheterization, and minimally invasive urology. The wire is designed to be used in a variety of procedures, including minimally invasive surgery, minimally invasive cardiac catheterization, and minimally invasive urology. The wire is designed to be used in a variety of procedures, including minimally invasive surgery, minimally invasive cardiac catheterization, and minimally invasive urology.
