Фотографии

Упаковка - Бандаж на поясничный отдел с усиленными ремнями, арт. S3041

- Brace provides support of the back muscles and stabilizes abdominal pressure for safer activity.
 - Reduces loads on the vertebrae and intervertebral discs.
 - Aeroprene provides heating and micro massage action, non-blocking skin respiration.
 - Tapered shape for a comfortable fit.
 - Two plastic stays in back provide firm support to lumbar area.
 - Reinforced strap design for adjustable compression.
 - Removable massage pad in lower back area stimulates back muscles.
 - Universal size (one size fits most).
- Back brace with power straps features stays and power straps. It is designed to help reduce unwanted or excessive movements of the lower back. It is recommended in case of chronic back ache as well as for repetitive sporting or occupational activities. The variable compression fastenings ensure a close, comfortable fit and the removable insert is designed to help provide a soothing lumbar massage during activities, aiding with muscular spasm.
- The support can be used for curing of osteochondrosis, radiculitis, displacements and hernias of vertebral disks, traumas, chronic pain in lumbosacral part of spine. Due to the durable, flexible and breathable material and plastic stays the brace provides reliable support of the lumbar area, relaxation of back muscles, and normalization of blood circulation.

RECOMMENDATIONS FOR USE:
Before use please consult with your doctor, support is recommended to wear directly on underwear, individual treatment and terms are determined by the physician.

CONTRAINDICATIONS:
Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +35 °C. Don't rub or wring out during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry-cleaning.

KNEE PATELLA STRAP BRACE

FASTENING

Natural Cotton

Soft Fixation

Fastening

Left or Right

UNIVERSAL SIZE
FITS MOST

Упаковка - Бандаж на коленный сустав разъемный, арт. S6010

Treatment and prevention of tendovaginitis, jumper's knee.
The pad reduces/eliminates compression, provides massaging effect.
The inner layer made of soft cotton fabric for comfort.
Relieves pain of strained muscles during activities.
Excellent fixation and compression due to additional run-stretching strap with velcro fasteners.
Simple design, comfortable for wearing without assistance.
Universal size (one size fits most).
Fits both left and right knees.

Indications for use:
Knee brace is specifically designed to help provide dynamic compression and support to knee joint complex. The vibration dampening pad helps ensure additional protection and support during occupational and sporting activities. It is useful in cases of jumper's knee, reducing tendon irritation and overuse. The knee brace removes the weight from knee joint.
It is recommended in cases of chronic overload of the knee joint (sports, professional), trauma, flat feet, patellofemoral pain syndrome, Osgood-Schlatter disease.
Anatomically shaped bandage ensures correct position during activities.

RECOMMENDATIONS FOR USE

Before use please consult with your doctor, support is recommended to wear directly on underwear. Individual treatment and terms are determined by the physician.

CONTRAINDICATIONS

Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +35 °C. Don't rub or wring out during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry-cleaning.

Упаковка - Бандаж на коленный сустав стабилизирующий регулируемый, арт. S6035

- Knee support design ensures adjustable fit and unrestricted range of motion.
- Patellar buttress helps stabilize and protect kneecap.
- Reinforced patella stabilizer prevents displacement.
- Heat retention and compression reduce risk of strains or injuries.
- Contour design and adjustable velcro closure for custom fit.
- Provides easy application and maximum support.
- Breathable aeroprene material lined with cotton behind knee for optimal comfort.
- Provides warmth and equal compression to weak or overstressed knee.
- Universal size (one size fits most).
- Fits both left and right knees.
- Stabilizing knee support ensures dynamic support and adjustable compression to the knee joint without restricting movement. The open patellar buttress fixes the kneecap and provides additional support and overall stability of the knee joint. It helps distribute the load over the joint during the movement, so relieves arthritic and meniscus pain.
- Inflammatory and degenerative diseases of the knee joint (initial stages of arthritis, synovitis, peritarticular edema, bursitis or arthrosis). If warming knee support is not contraindicated.
- Prevention of knee and/or kneecap trauma during participation in sports and physical activities.
- Chronic instability of the knee cap (recurrent subluxation). Injuries and ligamentous laxity of the knee joint in subacute phase or midterm and late rehabilitation after removing a plaster cast.
- It is recommended in case of arthritic knees, chronic aches and stiffness.
- It helps in case of strains, sprains, instability and patellar tracking.
- Provides support and stabilizes injured, weak or arthritic knees during occupational and sporting activities.
- Increases healing and keeps joints and muscles flexible.

RECOMMENDATIONS FOR USE:

Before use please consult with your doctor. Support is recommended to wear directly on underwear. Individual treatment and terms are determined by the physician.

Маркировка - Бандаж на коленный сустав стабилизирующий регулируемый, арт. S6035

Упаковка - Бандаж на коленный сустав вязанный эластичный, арт. S6040

Provides reliable support and protection of knee joint during activities.
Heat retention and compression reduce risk of strains or injuries.
The moisture wicking fabric is convenient for daily use.
Breathable fabric ensures additional comfort.
Fits both left and right knees.

Indications for use:

Knee support requires dynamic support and adjustable compression to the knee joint without restricting movement. It helps distribute the load over the joint during the movement, to relieve arthritic and muscular pain.
Inflammatory and degenerative diseases of the knee joint: initial stages of arthritis, synovitis, peritarticular inflammation, bursitis or arthralgia. Prevention of knee and/or knee cap trauma during participation in sports and physical activities. Chronic instability of the knee cap recurrent subluxation. Injuries and ligamentous laxity of the knee joint in subacute phase or medium and late rehabilitation after removing a plaster cast.
It is recommended in case of arthritic knees, chronic aches and stiffness.
It helps in case of strains, sprains, instability and painful tracking.
Provides support and stability in injured, weak or arthritic knees during occupational and sporting activities.
Increases healing and keeps joints and muscles flexible.

RECOMMENDATIONS FOR USE:

Before use please consult with your doctor, support is recommended to wear directly on under wear, individual treatment and terms are determined by the physician.

CONTRAINDICATIONS:

Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +25 °C. Don't rub or wring out during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry cleaning.

Упаковка - Бандаж на коленный сустав стабилизирующий с 4 спиральными ребрами жесткости,
арт. S6058

- Bandage design ensures adjustable fit and unrestricted range of motion.
- Patellar buttress helps stabilize and protect kneecap.
- Additional circle pad around patella provides protection and stabilization to prevent patella displacement.
- Two medial and lateral spiral removable stays provide additional support and stability.
- Heat retention and compression reduce the risk of strains or injuries.
- Contour design and adjustable straps ensure stability and prevent slipping. Provides easy application and maximum support.
- Breathable aeroprene material lined with cotton behind knee for optimal comfort. Provides warmth and equal compression to weak or overstressed knees.
- Universal size (one size fits most).
- Fits both left and right knees.
- Stabilizing knee support with 4 spiral stays ensures dynamic support and adjustable compression to the knee joint without restricting movement. The open patellar buttress fixes the kneecap and provides additional support and overall stability of the knee joint. It helps distribute the load over the joint during the movement, so relieves arthritic and meniscus pain.
- Inflammatory and degenerative diseases of the knee joint (initial stages of arthritis, synovitis, peritarticular edema, bursitis or arthrosis). If warming knee support is not contraindicated.
- Prevention of knee and/or kneecap trauma during participation in sports and physical activities.
- Chronic instability of the kneecap (recurrent subluxation). Injuries and ligamentous laxity of the knee joint in subacute phase or midterm and late rehabilitation after removing a plaster cast.
- It is recommended in case of arthritic knees, chronic aches and stiffness.
- It helps in case of strains, sprains, instability and patellar tracking.
- Provides support and stabilizes injured, weak or arthritic knees during occupational and sporting activities.
- Increases healing and keeps joints and muscles flexible.

Упаковка - Бандаж на голеностопный сустав регулируемый, арт. S7028

Minimizes risk of future injuries as well as strains, sprains and instability. Provides compression to weak or overstressed ankle.

Custom design and adjustable velcro fasteners ensure comfortable fit and stabilization during activities. Provides easy application and maximum support.

Non-toxic material provides shock absorption, dynamic compression and better breathability to the injured ankle during prolonged use.

Open toe and heel design ensure full range of movement.

Unisex size (one size fits most).

Fits both left and right feet.

Ankle support provides additional support and compression during sporting and recreational activities. It helps to reduce excessive joint motion as well as inversion and eversion of the ankle associated with ligamentous injury and instability of the ankle.

Thermal and compressive effects, which are provided by ankle joint support, favour fast healing of affected ligaments and prevent from repeated joint traumas.

It provides friction and compression of the tarsal joint. It can be used for treatment of traumas of the joint, atrophy, atrophy of ligaments, at rehabilitation stage after plaster removal.

It is recommended in case of weak or unstable ankles, sprains, strains and twisting injuries.

It prevents habitual dislocation or trauma during sport activities.

Ensures comfortable support and compression to increase circulation, relieve pain, improve healing and maintain flexibility.

Anatomical shape with open heel is more comfortable for everyday use.

Reusable non-toxic shockproof pad due to warming and micro-massage action.

Helps ankle to heal faster after the injury.

RECOMMENDATIONS FOR USE:

Before use please consult with your doctor. Support is recommended to wear directly on underwear. Individual treatment and terms are determined by the physician.

CONTRAINDICATIONS:

Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +25°C. Don't rub or wring out, during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry-cleaning.

Упаковка - Бандаж на локтевой сустав с дополнительной фиксацией, арт. S8321

- Provides support and relieves pain of stiff, swollen or injured elbows and strained muscles in forearm during activities.
 - Minimizes risk of future injuries and instability. Provides compression on weak or overstressed elbow.
 - Separable design and adjustable velcro fasteners ensure comfortable fit and stabilization during activities. Provides easy application and maximum support.
 - Additional round pressure point offers extra pressure on muscle in elbow.
 - Aeroprene material provides shock absorption, dynamic compression and better breathability during prolonged use.
 - Universal size (one size fits most).
 - Fits both left and right arms.
- Elbow brace provides adjustable compression and support to the elbow joint. It helps in case of repetitive sports injuries such as tennis and golfer's elbow by reducing excessive movements at the inner and outer sides of the joint. The support can also be used for recovery and during rehabilitation following surgery, trauma or injury.
- Provides support and relieves pain from stiff, swollen or injured elbows and strained muscles in forearm during activities.
 - Helps reduce pain due to tendonitis and bursitis.
 - Breathable neoprene keeps joint warm to improve healing and provides micro-massage effect which improves blood circulation and reduces elbow joint edema.
 - Inner layer made of soft cotton fabric for comfort.

RECOMMENDATIONS FOR USE:

Before use please consult with your doctor, support is recommended to wear directly on underwear, individual treatment and terms are determined by the physician.

CONTRAINDICATIONS:

Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +35°C. Don't rub or wring out during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry-cleaning.

ELBOW BRACE (WITH ADDITIONAL FIXATION), 1 pc.

Маркировка - Бандаж на локтевой сустав с дополнительной фиксацией. арт. S8321

Упаковка - Бандаж на локтевой сустав фиксирующий, арт. S8322

Treatment and prevention of lateral (tennis) elbow and medial (golf) elbow epicondylitis.
The pad redistributes bandage compression from the prominent epicondyles to the surrounding soft tissue and provides massaging effect.
The inner layer made of soft cotton fabric for comfort.
Relieves pain of strained muscles in forearm during activities.
Excellent fixation and compression due to additional non-stretching strap with velcro fastener.
Simple design, comfortable for wearing without assistance.
Universal size (one size fits most).
Fits both left and right arms.
Tennis/Golf Elbow Brace is specifically designed to help provide dynamic compression and support to the forearm muscles and elbow tendon complex. It reduces vibration, stress and strain at the medial and lateral elbow stabilizing and softening the flexor and extensor muscles in the forearm.
The vibration dampening pad helps ensure additional protection and support during occupational and sporting activities. It is useful in cases of tennis or golfer's elbow, reducing tendon irritation and overuse.
The elbow brace fixes arm flexor and extensor tendons, redistributes the weight from lateral and medial humeral epicondyles to tendons.

RECOMMENDATIONS FOR USE

Before use please consult with your doctor, support is recommended to wear directly on underwear. Individual treatment and terms are determined by the physician.

CONTRAINDICATIONS

Skin local diseases, individual intolerance of the raw material components.

Equipment used

Упаковка - Бандаж на лучезапястный сустав регулируемый, арт. S8514

- Wrist band relieves pain due to compression and fixation of the injured joint.
- Breathable elastic material provides moderate fixation and stabilization of the wrist joint.
- Provides therapeutic heat and compression support to wrist joint.
- Adjustable velcro strap customizes compression around wrist and ensures comfortable fit and stabilization during activities.
- The inner layer made of soft cotton fabric for comfort.
- Universal size (one size fits most).
- Fits both left and right hands.

Indications for use:

Pain affecting wrist caused by trauma or injury and different wrist joint disorders. Limited range of motion caused by trauma or injury and by ligamentous laxity of the wrist joint. Chronic tendon inflammation.

Condition after trauma and/or operation. Professional hazardous exposures on the wrist (vibration, rotation, lifting of weights). Trauma prevention at all levels of sport and physical activities.

- Breathable material (pergamer) keeps warmth not interfering with skin functions (protection, thermoregulation etc), improves blood circulation and ensures maximal comfort.
- Elastic loop provides additional comfort when putting on.

RECOMMENDATIONS FOR USE:

Before use please consult with your doctor, support is recommended to wear directly on underwear. Individual treatment and terms are determined by the physician.

CONTRAINDICATIONS:

Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +35 °C. Don't rub or wring out during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry-cleaning.

WREST BAND ADJUSTABLE, 1 pc.

Produttore: Medica S.r.l., 15 Kasserweg 10, Gattorna, Bulgaria 5300, tel.: +359 888 059 256, e-mail: info@medica-pro.com, medpack-group.com, dr-frei.com

Composizione: 45% cotone - 15% poliestere - 20% lana.

Confezionamento: 14-24 cm.

Condizioni d'uso: usare in un luogo asciutto a temperatura da +5°C a +25°C. Evitare l'uso prolungato.

Extra

UNIVERSAL SIZE
FITS MOST

Упаковка - Шина стабилизирующая на лучезапястный сустав регулируемая (R/L), арт. S8551

Stabilizing wrist brace features a removable metal splint for variable stabilization of the weak or stiff wrist in a neutral position.

- Support and protection for athletic and work activities.
- Provides reliable fixation and compression of the radiocarpal joint.
- Anatomically contoured metal stiffening plate and additional straps provide reliable stabilization of the joints and greater wrist stability.
- The inner layer made of soft cotton fabric for comfort.
- Universal size (one size fits most).
- Designed separately for left and right hands.

Indications for use:
Brace is used at wrist injuries, ligament sprains, arthrosis, arthritis, bursitis, synovitis, at rehabilitation stage after plaster removal as well as for prevention of arthritis, bursitis, tendovaginitis and their exacerbation.

It is intended for complete fixation of radiocarpal joint, provides warming and equal compression.

The brace is strengthened with rigid metal insert that completely limits motions of the radiocarpal joint.

The adjustable strap provides additional compression around the wrist if needed which can help encourage correct alignment of the carpal bones and therefore to reduce inflammation in the wrist, which is useful in the management of carpal tunnel syndrome.

- Provides reliable fixation and compression of the radiocarpal joint.
- The metal stiffening plate and additional straps ensure reliable stabilization of the joint.
- Anatomic shape is comfortable for daily use.

RECOMMENDATIONS FOR USE:

Before use please consult with your doctor, support is recommended to wear directly on underwear. Individual treatment and terms are determined by the physician.

CONTRAINDICATIONS:

Skin local diseases, individual intolerance of the raw material components.

MAINTENANCE: Wash with mild detergents at temperature no higher +35 °C. Don't rub or wring out, during washing and rinsing. Dry up away from sources of heat. Don't iron. Don't bleach. (Don't use chlorine-containing bleaching detergents). Don't use dry-cleaning.
