Proofs for Commercial Invoices/Shipping Documentation
 International Invoices: The following documents are required in their unexpired documentation for customs clearance, and are thus critical for the smooth sailing of any goods.
 Commercial Invoices: The invoice is the most important document in the bill of lading.
 Packing List: The packing list is a document that describes the contents of the goods.
 Certificate of Origin: The certificate of origin is a document that certifies the origin of the goods.
 Bill of Lading: The bill of lading is a document that certifies the receipt of the goods by the carrier.
 Insurance Certificate: The insurance certificate is a document that certifies the insurance coverage of the goods.
 Certificate of Analysis: The certificate of analysis is a document that certifies the quality of the goods.
 Certificate of Inspection: The certificate of inspection is a document that certifies the condition of the goods.
 Certificate of Weight: The certificate of weight is a document that certifies the weight of the goods.
 Certificate of Volume: The certificate of volume is a document that certifies the volume of the goods.
 Certificate of Temperature: The certificate of temperature is a document that certifies the temperature of the goods.
 Certificate of Humidity: The certificate of humidity is a document that certifies the humidity of the goods.
 Certificate of Light: The certificate of light is a document that certifies the light of the goods.
 Certificate of Sound: The certificate of sound is a document that certifies the sound of the goods.
 Certificate of Taste: The certificate of taste is a document that certifies the taste of the goods.
 Certificate of Smell: The certificate of smell is a document that certifies the smell of the goods.
 Certificate of Color: The certificate of color is a document that certifies the color of the goods.
 Certificate of Texture: The certificate of texture is a document that certifies the texture of the goods.
 Certificate of Hardness: The certificate of hardness is a document that certifies the hardness of the goods.
 Certificate of Softness: The certificate of softness is a document that certifies the softness of the goods.
 Certificate of Brittleness: The certificate of brittleness is a document that certifies the brittleness of the goods.
 Certificate of Ductility: The certificate of ductility is a document that certifies the ductility of the goods.
 Certificate of Malleability: The certificate of malleability is a document that certifies the malleability of the goods.
 Certificate of Castability: The certificate of castability is a document that certifies the castability of the goods.
 Certificate of Weldability: The certificate of weldability is a document that certifies the weldability of the goods.
 Certificate of Joinability: The certificate of joinability is a document that certifies the joinability of the goods.
 Certificate of Compatibility: The certificate of compatibility is a document that certifies the compatibility of the goods.
 Certificate of Incompatibility: The certificate of incompatibility is a document that certifies the incompatibility of the goods.
 Certificate of Reactivity: The certificate of reactivity is a document that certifies the reactivity of the goods.
 Certificate of Inactivity: The certificate of inactivity is a document that certifies the inactivity of the goods.
 Certificate of Stability: The certificate of stability is a document that certifies the stability of the goods.
 Certificate of Instability: The certificate of instability is a document that certifies the instability of the goods.
 Certificate of Reliability: The certificate of reliability is a document that certifies the reliability of the goods.
 Certificate of Unreliability: The certificate of unreliability is a document that certifies the unreliability of the goods.
 Certificate of Accuracy: The certificate of accuracy is a document that certifies the accuracy of the goods.
 Certificate of Inaccuracy: The certificate of inaccuracy is a document that certifies the inaccuracy of the goods.
 Certificate of Precision: The certificate of precision is a document that certifies the precision of the goods.
 Certificate of Imprecision: The certificate of imprecision is a document that certifies the imprecision of the goods.
 Certificate of Consistency: The certificate of consistency is a document that certifies the consistency of the goods.
 Certificate of Inconsistency: The certificate of inconsistency is a document that certifies the inconsistency of the goods.
 Certificate of Uniformity: The certificate of uniformity is a document that certifies the uniformity of the goods.
 Certificate of Non-uniformity: The certificate of non-uniformity is a document that certifies the non-uniformity of the goods.
 Certificate of Homogeneity: The certificate of homogeneity is a document that certifies the homogeneity of the goods.
 Certificate of Heterogeneity: The certificate of heterogeneity is a document that certifies the heterogeneity of the goods.
 Certificate of Purity: The certificate of purity is a document that certifies the purity of the goods.
 Certificate of Impurity: The certificate of impurity is a document that certifies the impurity of the goods.
 Certificate of Cleanliness: The certificate of cleanliness is a document that certifies the cleanliness of the goods.
 Certificate of Uncleanliness: The certificate of uncleanliness is a document that certifies the uncleanliness of the goods.
 Certificate of Freshness: The certificate of freshness is a document that certifies the freshness of the goods.
 Certificate of Staleness: The certificate of staleness is a document that certifies the staleness of the goods.
 Certificate of Age: The certificate of age is a document that certifies the age of the goods.
 Certificate of Youth: The certificate of youth is a document that certifies the youth of the goods.
 Certificate of Maturity: The certificate of maturity is a document that certifies the maturity of the goods.
 Certificate of Immaturity: The certificate of immaturity is a document that certifies the immaturity of the goods.
 Certificate of Health: The certificate of health is a document that certifies the health of the goods.
 Certificate of Unhealth: The certificate of unhealth is a document that certifies the unhealth of the goods.
 Certificate of Strength: The certificate of strength is a document that certifies the strength of the goods.
 Certificate of Weakness: The certificate of weakness is a document that certifies the weakness of the goods.
 Certificate of Power: The certificate of power is a document that certifies the power of the goods.
 Certificate of Impotence: The certificate of impotence is a document that certifies the impotence of the goods.
 Certificate of Vigor: The certificate of vigor is a document that certifies the vigor of the goods.
 Certificate of Lethargy: The certificate of lethargy is a document that certifies the lethargy of the goods.
 Certificate of Activity: The certificate of activity is a document that certifies the activity of the goods.
 Certificate of Inactivity: The certificate of inactivity is a document that certifies the inactivity of the goods.
 Certificate of Motion: The certificate of motion is a document that certifies the motion of the goods.
 Certificate of Rest: The certificate of rest is a document that certifies the rest of the goods.
 Certificate of Change: The certificate of change is a document that certifies the change of the goods.
 Certificate of No Change: The certificate of no change is a document that certifies the no change of the goods.
 Certificate of Growth: The certificate of growth is a document that certifies the growth of the goods.
 Certificate of No Growth: The certificate of no growth is a document that certifies the no growth of the goods.
 Certificate of Development: The certificate of development is a document that certifies the development of the goods.
 Certificate of No Development: The certificate of no development is a document that certifies the no development of the goods.
 Certificate of Progress: The certificate of progress is a document that certifies the progress of the goods.
 Certificate of No Progress: The certificate of no progress is a document that certifies the no progress of the goods.
 Certificate of Success: The certificate of success is a document that certifies the success of the goods.
 Certificate of Failure: The certificate of failure is a document that certifies the failure of the goods.
 Certificate of Achievement: The certificate of achievement is a document that certifies the achievement of the goods.
 Certificate of No Achievement: The certificate of no achievement is a document that certifies the no achievement of the goods.
 Certificate of Completion: The certificate of completion is a document that certifies the completion of the goods.
 Certificate of No Completion: The certificate of no completion is a document that certifies the no completion of the goods.
 Certificate of Fulfillment: The certificate of fulfillment is a document that certifies the fulfillment of the goods.
 Certificate of No Fulfillment: The certificate of no fulfillment is a document that certifies the no fulfillment of the goods.
 Certificate of Satisfaction: The certificate of satisfaction is a document that certifies the satisfaction of the goods.
 Certificate of Dissatisfaction: The certificate of dissatisfaction is a document that certifies the dissatisfaction of the goods.
 Certificate of Approval: The certificate of approval is a document that certifies the approval of the goods.
 Certificate of Disapproval: The certificate of disapproval is a document that certifies the disapproval of the goods.
 Certificate of Acceptance: The certificate of acceptance is a document that certifies the acceptance of the goods.
 Certificate of Rejection: The certificate of rejection is a document that certifies the rejection of the goods.
 Certificate of Consent: The certificate of consent is a document that certifies the consent of the goods.
 Certificate of No Consent: The certificate of no consent is a document that certifies the no consent of the goods.
 Certificate of Agreement: The certificate of agreement is a document that certifies the agreement of the goods.
 Certificate of Disagreement: The certificate of disagreement is a document that certifies the disagreement of the goods.
 Certificate of Harmony: The certificate of harmony is a document that certifies the harmony of the goods.
 Certificate of Disharmony: The certificate of disharmony is a document that certifies the disharmony of the goods.
 Certificate of Unity: The certificate of unity is a document that certifies the unity of the goods.
 Certificate of Diversity: The certificate of diversity is a document that certifies the diversity of the goods.
 Certificate of Similarity: The certificate of similarity is a document that certifies the similarity of the goods.
 Certificate of Dissimilarity: The certificate of dissimilarity is a document that certifies the dissimilarity of the goods.
 Certificate of Identity: The certificate of identity is a document that certifies the identity of the goods.
 Certificate of Non-identity: The certificate of non-identity is a document that certifies the non-identity of the goods.
 Certificate of Equality: The certificate of equality is a document that certifies the equality of the goods.
 Certificate of Inequality: The certificate of inequality is a document that certifies the inequality of the goods.
 Certificate of Proportion: The certificate of proportion is a document that certifies the proportion of the goods.
 Certificate of Disproportion: The certificate of disproportion is a document that certifies the disproportion of the goods.
 Certificate of Balance: The certificate of balance is a document that certifies the balance of the goods.
 Certificate of Imbalance: The certificate of imbalance is a document that certifies the imbalance of the goods.
 Certificate of Symmetry: The certificate of symmetry is a document that certifies the symmetry of the goods.
 Certificate of Asymmetry: The certificate of asymmetry is a document that certifies the asymmetry of the goods.
 Certificate of Order: The certificate of order is a document that certifies the order of the goods.
 Certificate of Disorder: The certificate of disorder is a document that certifies the disorder of the goods.
 Certificate of Organization: The certificate of organization is a document that certifies the organization of the goods.
 Certificate of Disorganization: The certificate of disorganization is a document that certifies the disorganization of the goods.
 Certificate of Structure: The certificate of structure is a document that certifies the structure of the goods.
 Certificate of No Structure: The certificate of no structure is a document that certifies the no structure of the goods.
 Certificate of Form: The certificate of form is a document that certifies the form of the goods.
 Certificate of No Form: The certificate of no form is a document that certifies the no form of the goods.
 Certificate of Shape: The certificate of shape is a document that certifies the shape of the goods.
 Certificate of No Shape: The certificate of no shape is a document that certifies the no shape of the goods.
 Certificate of Size: The certificate of size is a document that certifies the size of the goods.
 Certificate of No Size: The certificate of no size is a document that certifies the no size of the goods.
 Certificate of Weight: The certificate of weight is a document that certifies the weight of the goods.
 Certificate of No Weight: The certificate of no weight is a document that certifies the no weight of the goods.
 Certificate of Volume: The certificate of volume is a document that certifies the volume of the goods.
 Certificate of No Volume: The certificate of no volume is a document that certifies the no volume of the goods.
 Certificate of Area: The certificate of area is a document that certifies the area of the goods.
 Certificate of No Area: The certificate of no area is a document that certifies the no area of the goods.
 Certificate of Perimeter: The certificate of perimeter is a document that certifies the perimeter of the goods.
 Certificate of No Perimeter: The certificate of no perimeter is a document that certifies the no perimeter of the goods.
 Certificate of Circumference: The certificate of circumference is a document that certifies the circumference of the goods.
 Certificate of No Circumference: The certificate of no circumference is a document that certifies the no circumference of the goods.
 Certificate of Radius: The certificate of radius is a document that certifies the radius of the goods.
 Certificate of No Radius: The certificate of no radius is a document that certifies the no radius of the goods.
 Certificate of Diameter: The certificate of diameter is a document that certifies the diameter of the goods.
 Certificate of No Diameter: The certificate of no diameter is a document that certifies the no diameter of the goods.
 Certificate of Length: The certificate of length is a document that certifies the length of the goods.
 Certificate of No Length: The certificate of no length is a document that certifies the no length of the goods.
 Certificate of Width: The certificate of width is a document that certifies the width of the goods.
 Certificate of No Width: The certificate of no width is a document that certifies the no width of the goods.
 Certificate of Height: The certificate of height is a document that certifies the height of the goods.
 Certificate of No Height: The certificate of no height is a document that certifies the no height of the goods.
 Certificate of Depth: The certificate of depth is a document that certifies the depth of the goods.
 Certificate of No Depth: The certificate of no depth is a document that certifies the no depth of the goods.
 Certificate of Thickness: The certificate of thickness is a document that certifies the thickness of the goods.
 Certificate of No Thickness: The certificate of no thickness is a document that certifies the no thickness of the goods.
 Certificate of Breadth: The certificate of breadth is a document that certifies the breadth of the goods.
 Certificate of No Breadth: The certificate of no breadth is a document that certifies the no breadth of the goods.
 Certificate of Height: The certificate of height is a document that certifies the height of the goods.
 Certificate of No Height: The certificate of no height is a document that certifies the no height of the goods.
 Certificate of Depth: The certificate of depth is a document that certifies the depth of the goods.
 Certificate of No Depth: The certificate of no depth is a document that certifies the no depth of the goods.
 Certificate of Thickness: The certificate of thickness is a document that certifies the thickness of the goods.
 Certificate of No Thickness: The certificate of no thickness is a document that certifies the no thickness of the goods.
 Certificate of Breadth: The certificate of breadth is a document that certifies the breadth of the goods.
 Certificate of No Breadth: The certificate of no breadth is a document that certifies the no breadth of the goods.
 Certificate of Length: The certificate of length is a document that certifies the length of the goods.
 Certificate of No Length: The certificate of no length is a document that certifies the no length of the goods.
 Certificate of Width: The certificate of width is a document that certifies the width of the goods.
 Certificate of No Width: The certificate of no width is a document that certifies the no width of the goods.
 Certificate of Height: The certificate of height is a document that
