

A new beginning for electromagnetic navigation

Fusion™ Navigation System

Medtronic Navigation reinvents electromagnetic (EM) navigation with the new Fusion™ Navigation System: an innovative EM system that is accurate, easy to use and expandable as needed. Medtronic Navigation is the only company with both optical and EM navigation systems to meet your practice needs.

Superior, Reliable Accuracy. Fusion navigation is the first EM navigation device ever to offer reproducible accuracy comparable to our optical navigation systems. Simply put, no other EM system is this accurate.

Convenient and Easy to Use. Fusion navigation offers many features for your convenience, such as automated registration/verification, reusable instruments, multi-instrument tracking and surgeon-specific settings.

Expandable as Needed. If you need more, the Fusion system can do it. Modules will be available for different procedural solutions, so you can customize the system for your practice. Make it as basic or as robust as you like.

first&only

first&only ENT Electromagnetic Image-Guidance System that:

- Provides reproducible accuracy comparable to the high level of accuracy offered by our optical systems
- Works with reusable standard instruments
- Can track up to 3 instruments at a time

first&only ENT Image-Guidance System that:

- Allows customization for each surgeon, including:
 - Surgeon-specific room setup
 - Instrument preference
 - C.T. windowing
 - Orthogonal view positioning
- Provides navigation instruments with the same look and feel as your standard ENT instruments

first&only Navigation Company that:

- Offers both optical and EM image-guidance systems
- Image-guidance navigation support team dedicated to your needs

Convenient and Easy to Use.

- Surgeon Profiles save and load user-specific settings
- Simplified registration/verification
- Smaller footprint saves space in O.R.
- Footpedal-free
- Video in/out
- Optional BlueTooth wireless mouse

Six Reusable Standard Instruments Included.

Mirrors the instrument set you would use for ENT surgery without navigation (includes custom instrument tray)

- Registration Probe
- Straight Suction
- Curved Suction, 90°
- Straight Probe
- Curved Suction, 70°
- Ostium Seeker

Instrument Innovation

- Auto-recognition of instruments
- No calibration sequence required for verification
- HeadTracker kit with integrated TouchPad
- Track 3 instruments at once

Simple Registration.

Enhanced Tracer™ Contour Registration (default)

- Ideal for FESS
- Algorithm for enhanced accuracy
- Registration in less than a minute
- No headsets or fiducial markers required for C.T.

PointMerge® Registration

- Alternate registration method

Unparalleled Service and Support.

- Image-guidance navigation support team dedicated to your needs
- Local service and accountability

Software and Support Program

The Software and Support Program is one way we help you protect your technology investment. Your purchase of the Fusion Navigation System includes a one-year subscription to our Software and Support Program. This comprehensive program includes:

Services

Hardware Repair

- Labor for both on-site and off-site repair

Replacement Parts and Shipping

- Replacement and shipping of warranted parts

On-Line Support

- Via the system's on-board modem, our support staff can log into your unit to perform diagnostics and data transfer securely

Local Support

Our image-guided products are clinically and technically supported by our local sales, clinical and technical teams.

Your Medtronic Navigation representative will:

- Provide in-servicing as needed
- Provide responsive follow-up to questions and issues
- Assist in troubleshooting and facilitating parts exchange, if necessary
