VIVA™ XT CRT-D DTBA204

Cardiac Resynchronization Therapy (CRT-D) device with defibrillator function. The device is designed to treat heart failure by synchronizing the heart's electrical activity. It includes a defibrillator function to deliver shocks to the heart if necessary. The device is implanted in the chest area and connected to the heart via leads.

Limited Warranty

Medtronic's Five (5)-Year Limited Warranty and General Warning provided by Medtronic, Inc. for such other legal entity as may be referred to as the manufacturer on the labeling of the device ("Manufacturer").

This warranty is limited to the device and its components. It does not cover the device or its components if the device or its components have been damaged by misuse, abuse, neglect, or any other cause not within the control of the Manufacturer.

The Manufacturer warrants that the device and its components will be free from defects in materials and workmanship for a period of five (5) years from the date of first use of the device.

If a defect in materials or workmanship is discovered within the warranty period, the Manufacturer will, at its option, repair or replace the device or its components, or provide a refund of the purchase price of the device or its components.

This warranty is void if the device or its components have been used in a manner not intended by the Manufacturer, or if the device or its components have been modified or altered in any way.

The Manufacturer does not warrant the device or its components for use in any application not intended by the Manufacturer.

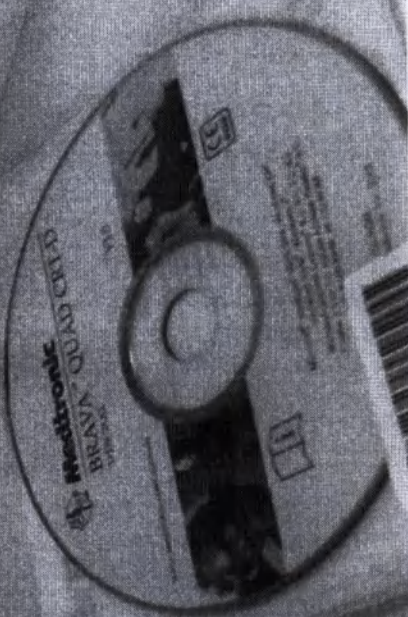

The Manufacturer's warranty is limited to the device and its components. It does not cover the device or its components if the device or its components have been damaged by misuse, abuse, neglect, or any other cause not within the control of the Manufacturer.

Medtronic
BRAVA™ QUAD CRT-D
DTBC200

Designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart. The device is designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart. The device is designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart.

The device is designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart. The device is designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart.

The device is designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart. The device is designed to deliver pacing therapy (VVI/VDD) or Cardioversion/Defibrillation (VVI/VDD/ICD) to the heart.
