## Диагностическая ультразвуковая система ARIETTA 50

### Инструкция по эксплуатации Данные по акустической мощности

Просьба к операторам и специалистам по обслуживанию:

- Прочтите документ «Руководство по эксплуатации» перед использованием диагностической ультразвуковой системы.
- После прочтения храните «Руководство по эксплуатации» в легкодоступном месте рядом с системой.

# Введение

Благодарим вас за приобретение диагностической ультразвуковой системы ARIETTA 50 производства FUJIFILM Healthcare Corporation.

Данный документ представляет собой инструкцию по эксплуатации для диагностической ультразвуковой системы ARIETTA 50.

В зависимости от того, какими дополнительными модулями была оснащена система на производстве, после названия марки «ARIETTA50» может быть добавлен соответствующий суффикс.

Любое упоминание «ARIETTA 50» в данном руководстве относится к моделям «ARIETTA 50» и «ARIETTA 50LE».

## Наименование и класс медицинского оборудования

### Название продукта

Диагностическая ультразвуковая система ARIETTA 50

## История редакций

№ редакции: 6

Дата обновления: 01.11.2021

## Условные обозначения, применяемые в этом руководстве

Представленные далее термины используются в настоящем руководстве для описания мер безопасности, которые должны соблюдаться для предотвращения угроз или травмирования операторов и пациентов. В зависимости от тяжести рисков и травм, которые могут произойти при несоблюдении этих мер безопасности, используются три категории: ОПАСНОСТЬ, ПРЕДУПРЕЖДЕНИЕ и ОСТОРОЖНО! Кроме того, термином ПРИМЕЧАНИЕ обозначаются другие меры предосторожности, которые должны соблюдать операторы.

### ОПАСНОСТЬ

Используется для обозначения угрожающе опасной ситуации, которая в случае, если ее не удастся избежать, может привести к смерти или тяжелой травме. Этот символ также обозначает непосредственно опасную ситуацию, которая может привести к полному разрушению устройств или пожару.

## ПРЕДУПРЕЖДЕНИЕ

Используется для обозначения потенциально опасной ситуации, которая в случае, если ее не удастся избежать, может привести к смерти или тяжелой травме. Этот символ также обозначает потенциальную (скрытую) опасность, которая может привести к полному разрушению устройств или пожару.

## ОСТОРОЖНО!

Используется для обозначения ситуации, которая, если ее не удастся избежать, может привести к легкой травме или травме средней тяжести. Этот символ также обозначает ситуацию, которая может привести к повреждению устройства или его части или к потере компьютерных данных.

## ПРИМЕЧАНИЕ

Используется для обозначения мер предосторожности, которые настоятельно рекомендуется соблюдать операторам во избежание повреждения или ухудшения работы устройств в ходе эксплуатации, а также для гарантии эффективного использования устройств. Кроме того, этот символ обозначает рекомендованные процедуры, состояния или действия, требующие особого внимания.

Меры безопасности разделены на следующие категории и обозначены следующими символами.

Используется для обозначения запрещенных условий или действий. Меры безопасности, сопровождаемые этим символом, описывают запрещенные условия или действия.

Используется для обозначения действий, которые должен выполнить пользователь.

## Символы настоящего руководства, не относящиеся к обычному набору буквенных и цифровых символов

Следует учитывать, что отображаемые в действительности экраны (включая значки и дизайн) могут отличаться от экранов диагностической ультразвуковой системы, приведенных в данном руководстве.

Некоторые из сообщений, описанных в данном руководстве, могут не отображаться диагностической ультразвуковой системой, это зависит от ее конфигурации (включая варианты системы и дополнительные модули).

В настоящем документе используются следующие символы.

| Символ   | Пояснение |
|----------|-----------|
| $\alpha$ | Альфа     |
| $\gamma$ | Гамма     |

| Символ | Пояснение |
|--------|-----------|
| т      | Пи        |

## О диагностической ультразвуковой системе ARIETTA 50

Данная система предназначена для использования врачами и другими квалифицированными лицами для проведения томографии и гемодинамической диагностики кровотока в теле человека.

Следует учитывать, что данную систему запрещается использовать для ультразвукового исследования глаз. Выходная акустическая мощность данной системы превышает верхний предел для офтальмологических исследований, установленный стандартами Управления по надзору за качеством пищевых продуктов и лекарственных средств США (FDA).

### 1. Меры предосторожности относительно использования и управления данной системой

- Эксплуатировать систему в диагностических целях разрешается только врачам и иным квалифицированным специалистам.
- Проводите сканирование в течение минимально короткого времени, необходимого для диагностики, и с наименьшей подходящей мощностью.
- Запрещается разбирать, ремонтировать или модифицировать данную систему или ее дополнительное оборудование без нашего разрешения. Ремонт системы должен выполняться нашими сертифицированными специалистами. В случае необходимости ремонта обращайтесь к нам.  
ПРИМЕЧАНИЕ: Под разборкой имеется в виду использование инструментов для снятия крышки или других деталей.  
ПРИМЕЧАНИЕ: Модификация означает присоединение к данной системе деталей или устройств, отличных от указанных производителем. Замена кабеля питания считается модификацией.
- Монтаж системы и любого дополнительного оборудования (сборка и подключение системы с использованием инструментов) должен выполняться нашими сертифицированными партнерами. В случае необходимости монтажа системы или дополнительного оборудования обращайтесь к нам.
- Перевозку системы (перемещение изделия с использованием транспортного средства, например, автомобиля или судна) должны осуществлять наши сертифицированные партнеры. В случае необходимости перевозки системы обращайтесь к нам.
- Периодически очищайте и проверяйте систему. Подробнее см. «Руководство по эксплуатации».
- Если во время использования системы наблюдаются какие-либо отклонения, немедленно извлеките датчик из тела пациента (или уберите датчик с поверхности тела пациента) и прекратите использование системы. Если у

пациента отмечаются необычные или аномальные симптомы, немедленно окажите ему соответствующую медицинскую помощь. Примите необходимые меры в отношении системы, как описано в «Руководстве по эксплуатации». При возникновении аномалии, не описанной в «Руководстве по эксплуатации», обратитесь в наш офис.

## 2. Меры предосторожности при монтаже системы

Данная система представляет собой медицинское электрооборудование, предназначенное для использования в больницах, научно-исследовательских центрах и других аналогичных учреждениях. Выполняйте монтаж системы в соответствии со следующим описанием.

- Выполняйте монтаж системы в соответствии с инструкциями, приведенными в разделе «Настройка перед использованием» документа «Руководство по эксплуатации».
- Среда установки системы должна соответствовать условиям, описанным в разделе «Внешние условия» «Руководства по эксплуатации».
- Выполняйте установку системы в среде, в которой можно обеспечить электромагнитную совместимость в соответствии с разделом «Меры предосторожности для поддержания электромагнитной совместимости» и «Указания по электромагнитной совместимости» документа «Руководство по эксплуатации».

Электромагнитная совместимость (ЕМС) означает, что система может сохранять безопасность и способность выполнять основные функции в указанной электромагнитной обстановке, не создавая электромагнитных помех, недопустимых для других устройств в данной обстановке.

## 3. Габаритные размеры и масса системы

|                                                                                                         |                                                                                                  |

# Классификация диагностической ультразвуковой системы ARIETTA 50

- Защита от поражения электрическим током: Медицинское электрооборудование, класс I
- Защита от поражения электрическим током (рабочие части): рабочая часть типа BF
  - Датчики и сканер

Подробные сведения о рабочих частях и деталях, с которыми требуется обращаться как с рабочими частями, см. на следующих рисунках (для датчика или сканера) и в следующей таблице.

- (1) Пример датчиков для поверхностного применения или для применения во время операции.
- (2) Пример датчиков для полостей тела.

| Применение датчиков | Рабочая часть (прямой контакт с телом пациента) | Детали, считающиеся рабочими частями | Длина между В и С |
|---------------------|-------------------------------------------------|--------------------------------------|-------------------|
| Поверхность тела    | Область ультразвукового облучения (D)           | Между А и В                          | 100 см            |
| Интраоперационный   | Область ультразвукового облучения (D)           | Между А и В                          | 20 см             |
| В полостях тела     | Между А и С                                     | Между А и С                          | -                 |

#### ЭКГ

Детали, размещаемые в пределах 2 метров от датчика биологического сигнала, рассматриваются как рабочие части. (См. рисунок ниже.)

Пример: ЭКГ

- Защита от поражения электрическим током (рабочие части с защитой от дефибрилляции): Данная система не предназначена для использования с рабочими частями, защищенными от дефибрилляции.
- Защита от проникновения воды или частиц
  - Рабочая часть датчика: IPX7 (выдерживает кратковременное погружение в воду)
  - Ножной переключатель
    - MP-2819: IPX7 (выдерживает кратковременное погружение в воду)
    - MP-2345B: IPX8 (выдерживает длительное погружение в воду)
  - Прочие детали: IPX0 (обычный прибор)
- Уровень безопасности при использовании в среде воздуха и огнеопасного ингаляционного анестетика или кислорода/оксида азота и огнеопасного ингаляционного анестетика.

- Данная система не предназначена для использования в смеси воздуха и огнеопасного ингаляционного анестетика или в смеси кислорода или закиси азота и огнеопасного ингаляционного анестетика.
- Режим работы: продолжительная работа

## Переработка или утилизация

### ОСТОРОЖНО!

Переработка или утилизация данного оборудования должна осуществляться надлежащим образом в соответствии с организационными правилами и местным законодательством.

Данный символ на оборудовании или его упаковке означает, что данное оборудование не должно утилизироваться в качестве бытовых отходов. Вместо этого его следует сдать в соответствующий пункт сбора для переработки электрических и электронных изделий. Обеспечив правильную утилизацию данного оборудования, вы сможете предотвратить потенциальные негативные последствия для окружающей среды и здоровья человека, которые могут возникнуть в случае неправильного обращения с данным оборудованием. Переработка материалов помогает сохранить природные ресурсы.

Данное оборудование содержит первичную батарею (литиевую батарею). Переработка или утилизация данного оборудования должна осуществляться надлежащим образом в соответствии с организационными правилами и местным законодательством. Для получения более подробной информации о переработке данного оборудования обратитесь в один из наших офисов, перечисленных на задней стороне обложки, или в местную службу утилизации бытовых отходов.

## Товарные знаки и зарегистрированные товарные знаки

Microsoft, Windows, Microsoft Excel и Windows Media представляют собой зарегистрированные товарные знаки или товарные знаки Microsoft Corporation в Соединенных Штатах Америки и/или других странах.

Adobe, Acrobat и Reader представляют собой товарные знаки или зарегистрированные товарные знаки Adobe Systems Incorporated в Соединенных Штатах Америки и/или других странах.

Названия компаний, продуктов и логотипы McAfee, как на английском, так и на японском языках, являются товарными знаками или зарегистрированными товарными знаками McAfee, Inc. или ее дочерних компаний.

Linux является товарным знаком или зарегистрированным товарным знаком Mr. Linus Torvalds в Японии и других странах.

VS-FlexGrid Pro copyright(C) 1999–2000 Videosoft Corporation.

This software is based in part on the work of the Independent JPEG Group.

Oracle и Java являются зарегистрированными товарными знаками компании Oracle и (или) ее дочерних предприятий. Прочие наименования могут быть товарными знаками их соответствующих владельцев.

Названия других компаний, продуктов и систем, упомянутые в инструкции по эксплуатации данного прибора, могут быть товарными знаками или зарегистрированными товарными знаками соответствующих организаций. В данном документе не содержатся символы <sup>TM</sup> и (R).

## **Меры предосторожности в отношении программного обеспечения, установленного в системе**

Запрещается выполнять следующие действия с программным обеспечением, установленным в данной системе.

1. Перепродажа, присвоение или передача самого программного обеспечения
2. Обратный инжиниринг, обратное компилирование или обратное ассемблирование
3. Модификация, изменение или перевод
4. Создание копий или дубликатов
5. Сдача в аренду третьим сторонам

## Содержание

12 / MN1-6464RU ред. 6

## Данные по акустической мощности

- 1.1 Измерения акустического выходного сигнала
- 1.2 Таблица акустической мощности (если отображение TI производится в соответствии с IEC 62359 ред.1)
- 1.3 Таблица акустической мощности (если отображение TI производится в соответствии с IEC 62359 ред.2)
- 1.4 Температура поверхности датчика

## 1.1 Измерения акустического выходного сигнала

Измерения акустического выходного сигнала, перечисленные в настоящем документе, получены с использованием диагностической ультразвуковой системы ARIETTA 50 при максимальных настройках акустического выходного сигнала в каждом режиме. Эти измерения выполнены в воде в соответствии с процедурами, установленными МЭК, FDA, AIUM и NEMA.

Отображаемую интенсивность ультразвукового луча (после поправки на акустическое затухание) рассчитывают по трем факторам.

- Интенсивности луча, измеренной в воде
- Глубины положения, в котором измеряли интенсивность луча
- Акустическая рабочая частота датчика

Интенсивность акустического выходного сигнала (после поправки на акустическое затухание) рассчитывают по следующим формулам:

$$I_a = I_w \times 10^{(-\alpha \times f_{wm} \times z / 10)}$$

$I_a$  (интенсивность после поправки на акустическое затухание) относится к расчетной интенсивности луча после прохождения через ткань (единицы измерения: мВт/см<sup>2</sup>).

$I_w$  (интенсивность, измеренная в воде) относится к расчетной интенсивности луча, измеренной в воде на расстоянии  $z$  (единицы измерения: мВт/см<sup>2</sup>).

$\alpha$  относится к коэффициенту акустического затухания (единицы измерения: дБ см<sup>-1</sup> МГц<sup>-1</sup>).

$f_{wm}$  относится к акустической рабочей частоте (единицы измерения: МГц).

Данная формула предполагает, что коэффициент акустического затухания  $\alpha$  в ткани остается постоянным и равен 0,3 дБ см<sup>-1</sup> МГц<sup>-1</sup>. Поскольку это значение меньше акустического затухания в мягких тканях, доза ультразвука, рассчитанная для данного положения, обычно превышает фактическую дозу. Однако при прохождении ультразвукового луча через ткань с высоким содержанием жидкости луч распространяется в ткани с крайне высоким акустическим затуханием, что приводит к тому, что доза ультразвука, рассчитанная для данного положения, становится ниже фактической дозы.

## 1.2 Таблица акустической мощности (если отображение TI производится в соответствии с IEC 62359 ред.1)

### 1.2.1 Точность отображения MI/TI

Механический индекс  $MI$  связан с пиковым акустическим давлением разрежения с учетом затухания,  $p_r$ ,  $\alpha$ . Точность отображения механического индекса должна быть связана с погрешностью измерений  $p_r$ .

Тепловой индекс  $Tl$  относится к общей мощности  $P$  и ослабленной максимальной в пространстве и усредненной во времени интенсивности  $I_{spta}$ ,  $\alpha$ .

Точность отображения тепловых индексов должна быть связана с погрешностью измерений  $P$  и  $I_{pi}$ .

Точность отображения  $Ml/Tl$  приведена для каждой таблицы акустического выходного сигнала.

## 1.2.2 Символы, используемые в таблице акустического выходного сигнала

Список символов в таблице акустической выходной мощности согласно IEC 61157 4.2.2

| Максимальная мощность  | усредненная во времени максимальная выходная мощность (максимальная мощность) (мВт)                                                                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| $p_{-}$                | пиковое акустическое давление расширения, измеренное в воде (МПа)                                                                                                                                                                         |
| $I_{ob}$               | интенсивность выходного луча (мВт/см <sup>2</sup> )                                                                                                                                                                                       |
| $I_{spta}$             | максимальная в пространстве и усредненная во времени интенсивность, измеренная в воде (мВт/см <sup>2</sup> )                                                                                                                              |
| $z_p$                  | расстояние от выходной поверхности датчика до точки максимального квадратичного интегрального значения импульсного давления (или максимального среднего квадратичного акустического давления для систем с незатухающими колебаниями) (мм) |
| $z_{tt}$               | расстояние от датчика до выходной поверхности датчика (мм)                                                                                                                                                                                |
| $z_{ts}$               | типичное значение расстояния удаления датчика (мм)                                                                                                                                                                                        |
| $w_{pb6} (  )$         | ширина -6-дБ импульсного луча в точке максимального квадратичного интегрального значения импульсного давления для параллельного направления (мм)                                                                                          |
| $w_{pb6} (\perp)$      | ширина -6-дБ импульсного луча в точке максимального квадратичного интегрального значения импульсного давления для перпендикулярного направления (мм)                                                                                      |
| $prr$ (PRF)            | скорость (частота) повтора импульса (Гц)                                                                                                                                                                                                  |
| $srr$                  | Частота повторного сканирования (Гц)                                                                                                                                                                                                      |
| Размеры выходного луча | размеры выходного луча (мм) X, Y                                                                                                                                                                                                          |
| $f_{awf}$              | акустическая рабочая частота (МГц)                                                                                                                                                                                                        |

Список символов в IEC 60601-2-37 (2007) Таблица 201.103

| Термин    | Полная расшифровка                      |
|-----------|-----------------------------------------|
| $\alpha$  | коэффициент акустического затухания     |
| $A_{apt}$ | площадь выходного луча на уровне -12 дБ |
| $d_{eq}$  | эквивалентный диаметр луча              |
| $f_{awf}$ | акустическая рабочая частота            |

| Термин           | Полная расшифровка                                   |
|------------------|------------------------------------------------------|
| $FL_x, FL_y$     | длина фокуса                                         |
| $I_{pa}, \alpha$ | ослабленная средняя интенсивность импульса           |
| $I_{pi}$         | интеграл интенсивности импульса                      |
| $I_{pi}, \alpha$ | интеграл ослабленной интенсивности импульса          |
| $MI$             | механический индекс                                  |
| $P$              | выходная мощность                                    |
| $P_\alpha$       | выходная мощность с учетом затухания                 |
| $p_r$            | пиковое акустическое давление разрежения             |
| $p_r, \alpha$    | ослабленное пиковое акустическое давление расширения |
| $p_{rr}$         | скорость повтора импульса                            |
| $TI$             | тепловой индекс                                      |
| $TIB$            | тепловой индекс костей                               |
| $TIC$            | тепловой индекс костей черепа                        |
| $TIS$            | тепловой индекс мягких тканей                        |
| $t_d$            | продолжительность импульса                           |
| $X, Y$           | размеры выходного луча на уровне -12 дБ              |
| $z$              | расстояние от источника до заданной точки            |
| $z_b$            | глубина для $TIB$                                    |
| $z_{bp}$         | глубина точки излома                                 |
| $z_s$            | глубина для $TIS$                                    |

Таблицы акустической мощности (Таблица 201.103) приведены для всех датчиков в каждом режиме, независимо от значения  $TI$  и  $MI$ .

Значения 1,0 для  $MI$  и  $TI$  не должны быть превышены в любом рабочем состоянии для следующих датчиков:

- C41L47RP(L)

## 1.2.3 Таблица акустического выходного сигнала

### (1) Электронные конвексные датчики

Acoustic output data in accordance with IEC 61157/4.2.2, accompanying literature

| Convex                           |                       | Acoustic power is controllable by the user. |            |         |         |            |           |                |                    |                   |                      |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TIR or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MC.

NOTE 5. Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\sigma$                    | 48.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| T/I              | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered if one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12A.2a are met, it is not required to enter any data in the columns related to TTS, TBH or TIC.

**NOTE 4** If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 5: Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $I_{\sigma}$                | 4.875% |

| Display accuracy |                              |
|------------------|------------------------------|
| M7               | 20% or 0.2, whichever larger |
| T7               | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                                       | M/I                  | Scan   | TDS    | TTH    | TTC    |
|--------------------------------|---------------------------------------|----------------------|--------|--------|--------|--------|
| Maximum Index Value            |                                       | 1.6                  | -      | 1.0    | -      | 2.5    |
| Associated acoustic parameters | $P_{1,a}$                             | (MPa)                | -      | -      | -      | -      |
|                                | $P_{1,a}$                             | (mW)                 | -      | -      | -      | -      |
|                                | Min of $[P_{1,a}(x,z), I_{a,a}(x,z)]$ | (mW)                 | -      | 69     | -      | 84     |
|                                | $I_{a,a}$                             | (cm)                 | -      | -      | -      | -      |
|                                | $I_{a,a}$                             | (cm)                 | -      | -      | -      | -      |
|                                | $I_{a,a}$                             | (cm)                 | -      | -      | -      | -      |
|                                | $I_{a,a}$ at max. $I_{a,a}$           | (cm)                 | 4.5    | -      | -      | 1.4    |
|                                | $I_{a,a}(x,z)$                        | (cm)                 | -      | -      | -      | -      |
|                                | $I_{a,a}(x,z)$                        | (cm)                 | B-2.55 | -      | D-3.05 | 0.45   |
|                                | $I_{a,a}$                             | (cm)                 | -      | -      | 0.67   | 0.67   |
| Other                          | Dim of $I_{a,a}$                      | (cm)                 | -      | -      | 1.1    | 1.1    |
|                                | X                                     | (cm)                 | -      | -      | -      | -      |
|                                | Y                                     | (cm)                 | -      | -      | -      | -      |
|                                | $I_{a,a}$                             | (cm)                 | 0.50   | -      | -      | -      |
|                                | $P_{1,a}$ at max. $I_{a,a}$           | (Hz)                 | 7176   | -      | -      | -      |
|                                | $I_{a,a}$ at max. $I_{a,a}$           | (MPa)                | 3.16   | -      | -      | -      |
|                                | $I_{a,a}$ at max. $I_{a,a}$           | (cm)                 | -      | -      | -      | -      |
|                                | $I_{a,a}$ at max. $I_{a,a}$           | (W/cm <sup>2</sup> ) | 483    | -      | -      | 0.42   |
|                                | $I_{a,a}$                             | (cm)                 | -      | -      | -      | -      |

NOTE 1 Data should only be entered in one of the columns related to TS

NOTE 2 Information need not be provided regarding TTC for any transducer assembly not intended for transducer or manual capable use

NOTE 3 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to TTH or TTC.

NOTE 4 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to TDS or TTT.

NOTE 5 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 6 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 7 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 8 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 9 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 10 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 11 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 12 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 13 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 14 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 15 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 16 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 17 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 18 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 19 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 20 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 21 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 22 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 23 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 24 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 25 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 26 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 27 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 28 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 29 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 30 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 31 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 32 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 33 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 34 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 35 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 36 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 37 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 38 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 39 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 40 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 41 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 42 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 43 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 44 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 45 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 46 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 47 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 48 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 49 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 50 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 51 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 52 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 53 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 54 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 55 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 56 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 57 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 58 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 59 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 60 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 61 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 62 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 63 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 64 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 65 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 66 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 67 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 68 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 69 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 70 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 71 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 72 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 73 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 74 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 75 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 76 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 77 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 78 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 79 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 80 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 81 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 82 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 83 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 84 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 85 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 86 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 87 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 88 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 89 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 90 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 91 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 92 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 93 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 94 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 95 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 96 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 97 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 98 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 99 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 100 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 101 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 102 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 103 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 104 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 105 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 106 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 107 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 108 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 109 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 110 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 111 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 112 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 113 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 114 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 115 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 116 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 117 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 118 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 119 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 120 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 121 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 122 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 123 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 124 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 125 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 126 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 127 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 128 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 129 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 130 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 131 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 132 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 133 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 134 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 135 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 136 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 137 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 138 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 139 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 140 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 141 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 142 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 143 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 144 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 145 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 146 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 147 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 148 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 149 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 150 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 151 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 152 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 153 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 154 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 155 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 156 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 157 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 158 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 159 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 160 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 161 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 162 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 163 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 164 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 165 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 166 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 167 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 168 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 169 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 170 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 171 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 172 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 173 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 174 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 175 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 176 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 177 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 178 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 179 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 180 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 181 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 182 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 183 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 184 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 185 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 186 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 187 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 188 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 189 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 190 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 191 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 192 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 193 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 194 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 195 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 196 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 197 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 198 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 199 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 200 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 201 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 202 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 203 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 204 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 205 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 206 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 207 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 208 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 209 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 210 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 211 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 212 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 213 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 214 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 215 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 216 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 217 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 218 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 219 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 220 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 221 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 222 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 223 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 224 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 225 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 226 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 227 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 228 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 229 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 230 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 231 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 232 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 233 If the requirements of 2011.4.2.4 are met, it is not required to enter any data in the column related to M/I.

NOTE 234 If the requirements of 2011.4.2.4 are met, it

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transistors assembly not intended for transcranial or neonatal cathodic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

**NOTE 5** Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_H$                       | 37.14% |
| $\alpha$                    | 48.75% |

| Display accuracy |                               |
|------------------|-------------------------------|
| MI               | 20% or 0.2, whichever larger  |
| TT               | 4.0% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                                   | <i>MI</i>            | TIS       |           | <i>TIB</i> | <i>TTC</i> |
|--------------------------------|-----------------------------------|----------------------|-----------|-----------|------------|------------|

NOTE 1 : Data should only be entered if one of the columns related to TIS

NOTE 2 : Information not required for reporting TIS for any column

NOTE 3 : If the maximum value of  $f_{max}$  is not required to enter any data in the column related to TIS, TIB or TTC.

NOTE 4 : If the maximum value of  $f_{max}$  is not required to enter any data in the column related to TIS, TIB or TTC.

NOTE 5 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 6 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 7 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 8 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 9 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 10 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 11 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 12 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 13 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 14 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 15 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 16 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 17 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 18 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 19 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 20 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 21 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 22 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 23 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 24 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 25 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 26 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 27 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE 28 : Flow Length of 20112.425 m is not required to enter any data in the column related to MI.

NOTE: Data should only be entered in one of the columns related to TES

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TSS, TSS or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |
| $I_p$                       |
| $D$                         |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered if one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any instances currently not intended for transpositional or internal capital uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to ME.

NOTE 1 Data should only be entered in one of the columns related to T25

Information need not be provided regarding TAC for any transducer assembly not intended for transduction of mechanical output.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to the MFL.

NOTE 4 If the requirements of 201.12.4.2b are

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\sigma$                    | 18.75% |

| Display accuracy |                               |
|------------------|-------------------------------|
| M/I              | 20% or 0.2, whichever larger  |
| size             | 4.0% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

|                                | Index label                               | MT        | TIS                              |                                | TIB | TTC      |
|--------------------------------|-------------------------------------------|-----------|----------------------------------|--------------------------------|-----|----------|

NOTE 1. Data would only be entered in one of the columns related to TIS.

NOTE 2. Information need not be provided regarding TTD for any transducer assembly not intended for transcranial or recorded supraline, unless otherwise specified.

NOTE 3. If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4. If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MT.

NOTE 1 Data should only be entered in one of the columns related to TIS

2. Information need not be provided regarding TIC for any transmission system if not intended for transmission or reception of signals.

NOTE 3. If the measurements of 2011/12 A 2 are not, it is not required to enter any data in the columns related to TTS, TH or TIC.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to ME.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 4 If the requirements of 201.12.4.25 are

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\text{ph}}$             | 37.14% |
| $D$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| V/I              | 60% or 0.4, whichever larger |

Table 201.103 - Acoustic output reporting table

| Index label                       | TIS |      | TIB      |          | TIC |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TTC for any transducers unless not intended for transducer or measured amplification

NOTE 3 If the requirements of 201.12.4.20 are met, it is not required to enter any data in the columns related to TTS, TTB or TTD.

NOTE 4 If the requirements of 201.12.4.20 are met, it is not required to enter any data in the columns related to MI.

NOTE 5 Information need not be provided regarding TTC for any transducers unless not intended for transducer or measured amplification

NOTE 6 If the requirements of 201.12.4.20 are met, it is not required to enter any data in the columns related to TTS, TTB or TTD.

NOTE 7 If the requirements of 201.12.4.20 are met, it is not required to enter any data in the columns related to MI.

**NOTE 1** Data should only be entered in one of the columns related to TDS

**NOTE 2** Information need not be provided regarding TIO for any transaction assuming not intended for transactional or nontransactional capital gains

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

**NOTE 5** Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\sigma$                    | 4.875% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered if entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TTC for any Transducer assembly not intended for transcranial or neonatal cephalic use

NOTE 3 If the requirements of 201.12.2.2 are met, it is not required to enter any data in the column related to TIS, TIB or TTC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MI.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any transacrylic anion, y not intended for transacrylic or neonatal metabolic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TSS, TDS or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

**NOTE 5** Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\alpha$                    | 4.875% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

Acoustic output data in accordance with IEC 61157/4.2.2, accompanying literature

ARIETTA 50

C35 Convex

Acoustic power is controllable by the user.

NOTE 1: Data should only be entered in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TTS for any transducer status; not intended for transducer or manual update uses

NOTE 3: If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TTB or TTC.

NOTE 4: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5: Focal Length is a NOMINAL value

NOTE 1 Data should only be entered in one of the columns related to TDS.

NOTE 2 Information need not be provided regarding TTC for any transducer variant; not intended for transducer or manual specific uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TDS, TB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 1 Data should only be entered in one of the columns related to ITS

STATEMENT 9 Information used and the resulting narrative TFC for new measures assume a not intended for transnational or regional ecological issues

NOTE 3. If the measurements of 201.12.4.2 are not, it is not required to enter any data in the columns related to TDS, TH or TAC.

NOTE 4 If the requirements of 201.2.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\rho$                      | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be recorded in use of the software related to TTS

NOTE 2 Information listed (not the procedure) regarding TTC for any measurement system, not intended for reproduction or material capital use

NOTE 3 The requirements of 2017.12.2. are the not required to enter any data in the column related to TTS, TTB or TTC

NOTE 4 The requirements of 2017.12.2. are the not required to enter any data in the column related to TTS, TTB or TTC

NOTE 5 Flow's depth is a NOMINAL value

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any TRANSPOUCH ASSEMBLY not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TES, TIB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |
| $I_H$                       |
| $P_s$                       |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1. Data should only be retained in one of the columns related to TIS

NOTE 2. Information need not be provided regarding TTC for any transducer assembly not intended for transcranial or neonatal cephalic use

NOTE 3. If the requirements of 201.12.4.3 are met, it is not required to enter any data in the column related to TIS, TIB or TTC.

NOTE 4. If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MI.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal catheter uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to T15, T18 or T19.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

**NOTE 5** Focal Length is a NOMINAL value

NOTE 1 Data would only be entered in one of the columns related to TIS.

NOTE 2 Information need not be provided regarding TIC for any "nonconformity" not intended for transponder or resonant capsule uses.

NOTE 3 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the column related to TIS, TIB or TIC.

NOTE 4 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the column related to ME.

NOTE: Data should only be entered in one of the columns related to TES

NOTE 2: Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TTB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to M1.

NOTE 5: Focal Length is a NOMINAL value

NOTE 1 Data should only be entered in one of the columns related to TDS

NOTE 2 Information need not be provided regarding TTC for any transducers assembly not intended for transverse or resonant capsule use

NOTE 3 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to TDS, TTB or TTC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MI.

NOTE! Data should only be entered in one of the columns related to TIS

**NOTE 2** Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to T15, T18 or T19.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5 Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
|                             | 48.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TIS.

NOTE 2: Information need not be provided regarding TTC for any transducer assembly yet intended for transcranial or neonatal applications.

NOTE 3: If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4: If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to MT.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TSS, TSS or TBC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_p$                       | 37.14% |
| $\rho$                      | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                                   | MT   | Scan | TDS | Non-scan                                            | TI/TB | TTC |
|--------------------------------|-----------------------------------|------|------|-----|-----------------------------------------------------|-------|-----|

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 1 Data around zero are centered at one or one constant remains 1.100

NOTE 2 Information need not be provided regarding TQ for any measurement system v not intended for transcranial or neonatal methods 1000

NOTE 2 Information need not be provided regarding IAC for any nonmedical assessment not intended for utilization of restriction requirements.

NOTE 3 If the requirements of 201.1.2.4.2 are met, it is not required to enter any data in the column related to M.

NOTE 4 If the requirements of 201.1.2.4.2b are met, it is not required to enter any data in the column related to M.

NOTE 5 Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_H$                       | 37.14% |
| $m$                         | 48.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TV               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any "transient anomaly," not intended for transcribed or recorded signals axis

NOTE 3 If the requirements of 301.12A.2b are met, it is not required to enter any data in the column related to TIS, TIB or TIC.

NOTE 4 If the requirements of 301.12A.2b are met, it is not required to enter any data in the column related to MI.

NOTE: Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be withheld for transcribed or narrated materials used

NOTE 3. If the coordinates of 201.12.4.2a are met, it is not needed to enter any data in the columns related to TSS, THH or THG.

NOTE 4 If the requirements of 301.17.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5 Focal Length is a NOMINAL value

|                             |           |        |
|-----------------------------|-----------|--------|
| measurement uncertainty (%) | $p$       | 25.00% |
|                             | $I_{\mu}$ | 37.14% |
|                             | $n$       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

Acoustic output data in accordance with IEC 61157/A2.2, accompanying literature

ARIETTA 50

C41V Convex

Acoustic power is controllable by the user.

NOTE 1 : Data should only be entered in one of the columns related to TIS

NOTE 2 : Information need not be provided regarding TIS for any "transmission" cases, not intended for transmission or resonant acoustic case

NOTE 3 : If the requirements of 20112.2.2 are met, it is not required to enter any of the columns related to TIS, TIB or TTC.

NOTE 4 : If the requirements of 20112.2.2b are met, it is not required to enter data in the columns related to ME.

NOTE 1: Data should only be entered in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TIC for any transducer element not intended for transposed or non-scan mode

NOTE 3: If the measurements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TTB or TTC.

NOTE 4: If the measurements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5: Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| Measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_a$                       | 37.14% |
| $P_r$                       | 18.75% |

|                  |                              |
|------------------|------------------------------|
| Display accuracy |                              |
| MT               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TIC for any transducer element not intended for transposed or non-scan mode

NOTE 3: If the measurements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TTB or TTC.

NOTE 4: If the measurements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5: Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| Measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_a$                       | 37.14% |

NOTE 1: Data should only be entered if one of the columns related to TTS

NOTE 2: Information need not be provided regarding TTS for any instrument currently not intended for transcranial or neonatal Doppler uses

NOTE 3: If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TTB or TTD.

NOTE 4: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

**NOTE ! Note should not be entered in any of the columns related to THE FOLLOWING LOOKS**

NOTE 1. Cells grown only in DMEM or DMEM containing 10% FBS were harvested at day 14.

NOTE 2. Information need not be provided unless TPO has been demonstrated to be essential for hematopoietic stem-cell self-renewal.

NOTE 2. Information need not be provided regarding TCU for any transaction resulting from enforcement of financial reporting laws.

NOTE 3 If the requirements of 2011.12.4.2.3 are met, it is not required to enter any data in the columns relating to 110, 112 or 113.

NOTE 4 If the requirements of 2011.12.4.2.3 are met, it is not required to enter any data in the column relating to 111.

NOTE 5 Focal Length is a NOMINAL value

1000

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_P$                       | 37.14% |
| $B$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered if one of the columns related to TIS

NOTE 2: Information not be provided regarding TIO for any "transmission anomaly" not intended for transmittal or recorded capsule use

NOTE 3: Information not be provided regarding TIO for any "transmission anomaly" not intended for transmittal or recorded capsule use

NOTE 4: If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIO.

NOTE 5: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to ME.

**Flow Area Loss**

NOTE: Values should only be entered in one of the columns related to 123

NO 1112 Information need not be provided regarding TIO for any Transfusion Assembly not intended for Transfusion or neonatal cap.

NOTE 3 If the requirements of 201.12.4.2.2 are met, it is not required to enter any data in the columns related to ME

NOTE 4 If the requirements of 201.12.4.2.3 are met, it is not required to enter any data in the columns related to ME

NOTE 5: Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $n$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

Acoustic output data in accordance with IEC 61157/4.2.2, accompanying literature

# ARIETTA 50

## C41V1 Convex

Acoustic power is controllable by the user.

NOTE 1 : Data should not be entered if one of the columns related to TDS

NOTE 2 : Information need not be provided regarding TTC for any "non-scan" activity not intended for transcranial or noncranial capsule uses

NOTE 3 : If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TDS, TTB or TTC.

NOTE 4 : If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MT.

NOTE 1 Data should only be entered in one of the columns related to TIS

|       |        |
|-------|--------|
| $p$   | 25.00% |
| $I_H$ | 37.14% |
| $n$   | 48.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered if one of the columns related to TIS

NOTE 2 Information read not be provided regarding TIC for any transducer assembly not intended for transcranial or noncranial cephalic use

NOTE 3 If the requirements of 201.12.2.2b are met, it is not required to enter any data in the column related to TIS, TIR or TIC.

NOTE 4 If the requirements of 201.12.2.2b are met, it is not required to enter any data in the column related to M/I.

NOTE 1 Data should only be entered in one of the columns related to TIS

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_{ph}$                    | 37.14% |
| $n$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TTS.

NOTE 2: Information should not be provided regarding TTC for any "non-scan" column, not intended for "non-scan" or "non-scan" data.

NOTE 3: If the measurement of 201.12.4.2 is not required, it is not required to enter any data in the columns related to TTS, TTB or TTC.

NOTE 4: If the measurement of 201.12.4.2 is not required, it is not required to enter any data in the columns related to MT.

NOTE 5: "Flow" length is a "Flow" value.

NOTE 1 Data should only be entered in one of the columns related to TIS  
NOTE 2 Information need not be provided regarding TIS for any "succession" cases, i.e. not intended for transferred or non-sold capital cases  
NOTE 3 If the requirements of 201.12.2.26 are met, it is not required to enter any data in the columns related to TIS, TIS or TIO.  
NOTE 4 If the requirements of 201.12.2.26 are met, it is not required to enter any data in the columns related to ME.  
NOTE 5 If the requirements of 201.12.2.26 are met, it is not required to enter any data in the columns related to ME.  
NOTE 6 Fiscal Year 2011, values are NOMINAL

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $p_i$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                                   | MI    | Scan | TIS | TIB | TTC  |
|--------------------------------|-----------------------------------|-------|------|-----|-----|------|
| Maximum Index Value            |                                   | 1.4   | 0.80 | -   | -   | 1.0  |
| Associated acoustic parameters | $P_{r,a}$                         | (MPa) | 3.1  | -   | -   | -    |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be repeated regarding TIS for any transceivers except for transceivers not intended for terrestrial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12A.2b are met, it is not required to enter any data in the columns related to TIS, TIS or TIS.

NOTE 4 If the requirements of 201.12A.2b are met, it is not required to enter any data in the column related to M.

NOTE 5 Found 1 earth is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_H$                       | 37.14% |
| $R$                         | 48.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| 77               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TTC for any transducer assembly not intended for transducer or resonant capsule uses

NOTE 3 If the requirements of 201.12.4.23 are met, it is not required to enter any data in the columns related to TTS, TB or TTC.

NOTE 4 If the requirements of 201.12.4.23 are met, it is not required to enter any data in the column related to MI.

NOTE 5 Focal Length is a NOMINAL value

NOTE 1 Data should only be entered in one of the columns related to TSS

**NOTE 1** Data are given only for studies in one of the categories relating to (12)

**NOTE 2** Information need not be supplied concerning TSC for non-transmission systems and interrelated non-transmission components.

NOTE 2. Information need not be provided regarding IAC for any nonresidential assembly not intended for theatrical or musical purposes.

NOTE 3. If the merchandise of 301.13.4.2a are used, it is not required to submit new data in the column indicated in 328.13B - 32C.

NOTE 3 If the requirements of 201.12.4.3.2 are met, it is not required to enter any data in the columns related to 101.12.4.3.2.

NOTE 4 If the requirements of 201.12.4.3b are met, it is not required to enter any data in the column related to 101.12.4.3b.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\mu$                       | 18.75% |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any transducer unless not intended for transducer or resonant acoustic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) | Display accuracy |
|-----------------------------|------------------|
| $p_r$                       | 25.00%           |
| $I_{p,e}$                   | 37.14%           |
| $p_r$                       | 18.75%           |

| Measurement uncertainty (%) | Display accuracy             |
|-----------------------------|------------------------------|
| $p_r$                       | 20% or 0.2, whichever larger |
| $I_{p,e}$                   | 40% or 0.4, whichever larger |
| $p_r$                       |                              |

| Flow Area Lock                 |                                            | n/a                  | n/a    | n/a | n/a   |        |

NOTE 1: Data should only be entered if one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any instance column; not intended for transcranial or neonatal capillar uses

NOTE 3: If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4: If the requirements of 201.12.4.2b are met, it is not required to enter data in the column related to ME.

NOTE 1: Data should only be entered in one of the columns related to THIS FLOW PATH LOCK.

NOTE: Information need not be recorded separately TIC for any transaminases as this is not intended for transaminase or neonatal catheter use.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to ITS, TBI or TQC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

**NOTE 5** Focal Length is a NOMINAL value

|                             |       |        |
|-----------------------------|-------|--------|
| measurement uncertainty (%) | $p$   | 25.00% |
|                             | $I_H$ | 37.14% |
|                             | $n$   | 18.75% |

Display accuracy

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TDS

NOTE 2: Information need not be provided regarding TTC for any transducer column; not intended for transducer or resonant capsule uses

NOTE 3: If the requirements of 2011.2.4.2 are met, it is not required to enter any data in the columns related to TDS, TTB or TTC.

NOTE 4: If the requirements of 2011.2.4.2b are met, it is not required to enter data in the column related to ME.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TFC for any transaction assumed to not be extended for transactional or nonreciprocal cashless sales.

NOTE 3 If the requirements of 201.17.4.2a are met, it is not required to enter any data in the columns related to FIS, TBH or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $m$                         | 48.75% |

Display accuracy

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| 77               | 40% or 0.4, whichever larger |

Table 291.143 - Amounts subject reporting table

[illegible]

| measured accuracy (%) |
|-----------------------|
| 20.00%                |
| 20.14%                |
| 19.70%                |

| Display accuracy |                            |
|------------------|----------------------------|
| ΔG               | 38% at 0.2, whisker larger |
| TI               | 40% at 0.4, whisker larger |

NOTE 1 : Data itself may be entered in case of the column related to TB

NOTE 2 : Information need not be provided regarding TIC for any "nominal values". TIC included for convenience if interested parties want.

NOTE 3 : If the measurement of 20-150kHz interval, it is not required to enter any data in the column related to TIB, TIR or TIC.

NOTE 4 : If P4 measurement of 20-150kHz one link, it is not required to enter any data in the column related to TIC.

| transformation yield (%) | transformation yield (%) |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any 'non-scan' column not intended for transcranial or neonatal cephalic use

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TIB or TIL

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT

NOTE 5 Flow Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\text{a}}$              | 37.14% |
| $P_{\text{r}}$              | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| T7               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any 'non-scan' column not intended for transcranial or neonatal cephalic use

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TIB or TIL

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT

NOTE 5 Flow Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\text{a}}$              | 37.14% |
| $P_{\text{r}}$              | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| T7               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be returned in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TTC for any transducers assuming not intended for transcranial or reservoir capsule uses

NOTE 3: If the requirements of 20.11.4.20 are met, A is not required to enter any data in the column related to TTS, TTH or TTC.

NOTE 4: If the requirements of 20.11.4.20 are met, A is not required to enter any data in the column related to MT.

NOTE 1 Data should only be entered in one of the columns related to TIS

DATA should only be entered in one of the columns related to IS

NOTE 2 Information need not be provided regarding TIC for any transaction assembly not intended for transnational or neonatal export.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to 201.12.4.2b.

NOTE 4 If the requirements of 201.12.4.2b are not met, the test is not valid.

| measurement uncertainty (%) |               |
|-----------------------------|---------------|
| $P$                         | 25.00%        |
| $I_{\mu}$                   | 37.14%        |

|                                | Sample gate depth (cm)                             | n/a  | n/a  | n/a | n/a | n/a  |
|                                | Triplets Frame Rate (cm)                           | n/a  | n/a  | n/a | n/a | n/a  |
|                                | Triplets VEL Range                                 | n/a  | n/a  | n/a | n/a | n/a  |
|                                | Flow Area Lock                                     | n/a  | n/a  | n/a | n/a | n/a  |

NOTE 1 Data should only be entered in case of the columns related to TIS

NOTE 2 Information need not be provided regarding TTC for any measurement system not intended for transcranial or intracranial Doppler uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIR or TTC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter data in the columns related to MT.

|        | Flow                                                                                                                                      | Area | LC | 10.8 | 10.9 | 10.10 | 10.11 | 10.12 |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------|------|----|------|------|-------|-------|-------|
| NOTE 1 | Data should only be entered in one of the columns related to TIS                                                                          |      |    |      |      |       |       |       |
| NOTE 2 | Information need not be provided regarding TIO for any transducer assembly not transduced for untransduced or nontransduced cephalo cases |      |    |      |      |       |       |       |
| NOTE 3 | If the requirements of 201.12.4.2.6 are met, it is not required to enter any data in the columns related to TIS, TBI or TIO.              |      |    |      |      |       |       |       |
| NOTE 4 | If the requirements of 201.12.4.2.6 are met, it is not required to enter any data in the columns related to MI.                           |      |    |      |      |       |       |       |
| NOTE 5 | Field Length is a NOMINAL value                                                                                                           |      |    |      |      |       |       |       |

| measurement uncertainty (%) |           |
|-----------------------------|-----------|
| $p$                         | 25.00%    |
| $I_{\mu}$                   | 37.14%    |
|                             | 1.8. 703M |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| IT               | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                                                | MT    | Scan | TIS  | TIR  | TTC  |
|--------------------------------|------------------------------------------------|-------|------|------|------|------|

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TTS for any transducer unless not intended for transducer or non-scan output uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, T7B or T7C

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to M/I

NOTE 5 Focal Length is a NOMINAL value

| Measurement Uncertainty (%) |        |
|-----------------------------|--------|
| P                           | 25.00% |
| $I_a$                       | 37.14% |
| $I_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| T7               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in use of the columns related to TIS

NOTE 2: Information need not be provided regarding TTD for any transducer assembly not intended for transponder or associated cables

NOTE 3: If the column is not used, the column should be marked as "N/A" or "Not Applicable". If the column is not used, the column should be marked as "N/A" or "Not Applicable".

NOTE 4: If the column is not used, the column should be marked as "N/A" or "Not Applicable". If the column is not used, the column should be marked as "N/A" or "Not Applicable".

NOTE 5: Focus Length is a NOMINAL value

NOTE 1 Data should only be entered in one of the columns related to TYS  
NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transaxial or neonatal cephalic uses  
NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TYS, TIB or TIC.  
NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MIB, TIB or TIC.

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3: If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4: If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 5: Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| P                           | 25.00% |
| $I_a$                       | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| T                | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 1: Data should only be entered at one of the courses listed in the

NOTE 2: Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.3a are met, it is not required to enter any data in the columns related to TSS, TSS or TIG.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $p$                         | 25.00% |
| $I_H$                       | 37.14% |
| $\alpha$                    | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| 77               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3: If the requirements of 201.12.4.2a are met, it is not required to enter any data in the column related to TTS, TB or TIC

NOTE 4: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT

NOTE 5: Focal Length is a NOMINAL value

| Measurement uncertainty (%) | Display accuracy             |
|-----------------------------|------------------------------|
| $P_r$                       | 25.00%                       |

NOTE 1 Data should only be entered in one of the columns related to TIS.  
NOTE 2 Information need not be provided regarding TIS for any treatment arm(s) not intended for treatment or treatment of residual oesophago cases.  
NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.  
NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to M.

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_p$                       | 37.14% |
| $D$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1. Data should only be entered in use of the columns related to TS.

NOTE 2. Information need not be provided regarding TTC for any "non-scan" column; not intended for "non-scan" or "non-scan" related use.

NOTE 3. If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TJS, TJB or TTD.

NOTE 4. If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to ME.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer unless it is intended for transducer or associated capsule uses

NOTE 3 If the requirements of 2011A2b are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4 If the requirements of 2011A2b are met, it is not required to enter any data in the columns related to MT.

NOTE 1 Data should not be entered in any of the columns related to the NEW FIRM LOOK.

NOTE 1: Data are only included in case of the occurrence of the event.

NOTE 2: Information need not be provided regarding TIC for any transverse assembly not intended for transcranial or neonatal cephalic uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any "transducer status" not intended for transmission or non-scan output

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIB, TIB or TTC

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MT

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{p,a}$                   | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TTS              | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any "transducer status" not intended for transmission or non-scan output

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIB, TIB or TTC

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MT

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{p,a}$                   | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TTS              | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                 | MT   | Scan | TIS | TTB   | TTC    |
|--------------------------------|-----------------|------|------|-----|-------|--------|
| Maximum Index Value            |                 | 0.74 | -    | -   | 0.93  | 0.81   |
| Associated acoustic parameters | $P_{1, \alpha}$ | 1.8  | -    | -   | -     | -      |
|                                | $P_{1, \alpha}$ | (mW) | -    | -   | -     | -      |
|                                | $P_{1, \alpha}$ | (mW) | -    | -   | -     | -      |
|                                | $P_{1, \alpha}$ | (cm) | -    | -   | -     | -      |
|                                | $P_{1, \alpha}$ | (cm) | -    | -   | -     | -      |

NOTE 1 Data should only be entered in one of the columns related to TIS  
NOTE 2 Information need not be provided regarding TIS for any transducer assembly not intended for transcranial or neonatal cephalic uses  
NOTE 3 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TIB, TIB or TIB  
NOTE 4 If the requirements of 201.12.4.3 are met, it is not required to enter any data in the columns related to TIB  
NOTE 5 Flow Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{10}$                    | 37.14% |
| $P_{10}$                    | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| T                | 40% or 0.4, whichever larger |

| Flow Area Lock                 | n/a                  | n/a     | n/a      | n/a | n/a     |

NOTE 1 Data should only be entered in one of the columns related to TIS  
NOTE 2 Information need not be provided regarding TIS for any transducer assembly not intended for transcranial or neonatal cephalic uses  
NOTE 3 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TIB, TIB or TIB  
NOTE 4 If the requirements of 201.12.4.3 are met, it is not required to enter any data in the columns related to TIB  
NOTE 5 Flow Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{10}$                    | 37.14% |
| $P_{10}$                    | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| T                | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                             | MI     | Scan | TTS  | TTH  | TTC  |
|--------------------------------|-----------------------------|--------|------|------|------|------|
| Maximum Index Values           |                             | 1.6    | -    | 0.34 | 1.3  | 1.2  |
| Associated acoustic parameters | $P_{r,a}$                   | (MPa)  |      |      |      |      |
|                                | $P$                         | (mW)   |      |      |      |      |
|                                | Min of $[P(x), f_{w,a}(x)]$ | (mW)   |      | 12   | 12   | 14   |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any manufacturer assuming not intended for transcranial or neonatal catheter uses

NOTE 3 If the requirements of 201.1.2.4.3a are met, it is not required to enter any data in the columns related to T15, T18 or T19.

NOTE 4 If the requirements of 2D1.12.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_p$                       | 37.14% |
| $n$                         | 18.75% |

|                                | $f_{ave}$                         | (cm)  | -    | -                                                          | -        | -    |
|                                | <                                 |       |      |                                                            |          |      |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transverse assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TIB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $p_{\cdot}$                 | 18.75% |

|                                |                                 |                      |           |                                                                                  |           |             |

NOTE 1 Data should only be retained in row of the column related to TDS

NOTE 2 Information need not be provided regarding TTC for any transducers assembly not intended for transcranial or intracranial Doppler uses

NOTE 3 If the requirements of 20.11.4.3.2 are met, it is not required to enter any data in the column related to TTB, TTB or TTC.

NOTE 4 If the requirements of 20.11.4.3.2 are met, it is not required to enter any data in the column related to MT.

NOTE 1 Data should only be entered in one of the columns related to THE FLOW AFTER LOCK.

NOTE 1: Data should only be entered in one of the columns marked 1 to 3.

NOTE 2: Information need not be recorded regarding TIC for new transmitters unless v not intended for transmittal or secondary cathodic uses.

NOTE 3 If the measurements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TTS, TH, or TFC.

NOTE 4 If the requirements of 2011.2.4.2b) are met, it is not required to enter any data in the column related to M.

NOTE 5 Focal length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\sigma$                    | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TDS

NOTE 2 Information need not be provided regarding TDS for any transducer element not intended for transducer or mounted capable uses

NOTE 3 If the measurements of 7735, 7718 or 77C are not required to enter any data in the columns related to TDS, TDS or TDS.

NOTE 4 Flow [cm/s] is a SCALAR, value

NOTE: Data should only be entered in one of the columns related to TIS

**NOTE 2:** Information need not be provided regarding TIO for any transaction assumed, or not intended for transactional or nonrecital capital assets.

NOTE 3 If the requirements of 201.12.4.3a are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{pt}$                    | 37.14% |
| $D$                         | 18.75% |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or noncranial cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\text{a}}$              | 37.14% |
| $P_{\text{r}}$              | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TIS              | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or noncranial cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\text{a}}$              | 37.14% |
| $P_{\text{r}}$              | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TIS              | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered if entered in one of the columns related to TBS

NOTE 2 Information need not be provided regarding TIC for any resources assembly not intended for transcranial or neonatal capsule use

NOTE 3 If the requirements of 201.12.4b are met, it is not required to enter any data in the columns related to TIS, TBS or TIC.

NOTE 4 If the requirements of 201.12.4b are met, it is not required to enter any data in the columns related to ME.

NOTE 1 Data should only be entered in one of the columns related to the

[illegible]

NOTE 2 If the measurements of 2011/2/3 are used, it is not possible to enter new data in this column related to 175 TBH or 170 TBH.

NOTE 4. If the measurements of 2011.2-4.2b are used, it is not required to enter any data in the columns related to ME

NOTE 5: Focal Length is a NOMINAL value

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $\sigma$                    | 48.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| T/I              | 40% or 0.4, whichever larger |

[illegible]

NOTE 1 Data should only be entered in one of the columns related to 125

NOTE 2: Information need not be provided regarding TIC for any therapeutic assembly not intended for transcranial or neonatal application.

NOTE 3 If the requirements of 201.12.A.2a are met, it is not required to enter any data in the columns related to 201.12.A.2b. With a maximum of 501,514 sq. ft. of floor area, the building is not subject to the requirements of 201.12.A.2b.

NOTE 5: For the requirements of 2011/2/2 and 2011/2/2 and 2011/2/2, it is not required to

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| 92               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transducer or nonmetal capillary uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIB or TTC

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MT

NOTE 5 Focal Length is a NOMINAL value

| Measurement Uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_a$                       | 37.14% |
| $P_i$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| T7               | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                                                                       | MT  | TIS  |          | TIB | TTC  |
|-----------------------------------------------------------------------------------|-----|------|----------|-----|------|
|                                                                                   |     | Scan | Non-scan |     |      |
| $A_{\text{scan}} \leq 3 \text{ cm}^2 / \text{A}_{\text{non}} \leq 1 \text{ cm}^2$ |     |      |          |     |      |
| Maximum Index Value                                                               | 1.3 | -    | 0.74     | -   | 1.8  |

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2: Information should not be provided regarding TIC for any transducer/element not intended for transcranial or neonatal cephalic use

NOTE 3: If the requirements of 201:12A.2b are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4: If the requirements of 201:12A.2b are met, it is not required to enter any data in the columns related to ME.

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| T7               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any TRANSUCER ASSEMBLY not intended for transcranial or neonatal cephalo uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TIB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 5 Fiscal month is a MONTHAL value.

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any "Transducer assembly" not intended for transverse or isothermal area

NOTE 3: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MI.

NOTE 5 Focal Length is a NOMINAL value

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any transducer currently not intended for transcranial or neonatal applications

NOTE 3: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to TIS, TTB or TIC.

NOTE 4: If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to MI.

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 1: Data reported only on animals in one of two treatment regimens (1.02

NOTE 2: Information need not be provided regarding IAC for any nonacademic assignment not intended for evaluation or assessment purposes.

NOTE 4 If the measurements of 201.2 & 203 are met, it is not required to enter any data in the column related to ME.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |         |
|-----------------------------|---------|
| $p$                         | 25.00%  |
| $I_H$                       | 37.14%  |
|                             | 9.87524 |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TIC.

NOTE 2: Information need not be provided regarding TIC for any "transient" assembly not intended for "transient" capable use.

NOTE 3: If the requirements of 201.15.4.2b are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 4: If the requirements of 201.15.4.2c are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 5: If the requirements of 201.15.4.2d are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 6: If the requirements of 201.15.4.2e are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 7: If the requirements of 201.15.4.2f are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 8: If the requirements of 201.15.4.2g are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 9: If the requirements of 201.15.4.2h are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 10: If the requirements of 201.15.4.2i are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 11: If the requirements of 201.15.4.2j are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 12: If the requirements of 201.15.4.2k are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 13: If the requirements of 201.15.4.2l are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 14: If the requirements of 201.15.4.2m are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 15: If the requirements of 201.15.4.2n are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 16: If the requirements of 201.15.4.2o are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 17: If the requirements of 201.15.4.2p are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 18: If the requirements of 201.15.4.2q are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 19: If the requirements of 201.15.4.2r are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 20: If the requirements of 201.15.4.2s are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 21: If the requirements of 201.15.4.2t are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 22: If the requirements of 201.15.4.2u are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 23: If the requirements of 201.15.4.2v are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 24: If the requirements of 201.15.4.2w are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 25: If the requirements of 201.15.4.2x are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 26: If the requirements of 201.15.4.2y are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 27: If the requirements of 201.15.4.2z are met, it is not required to enter any data in the column related to TIC, TIB or TTD.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2. Information need not be provided regarding TIC for any transaction assuming not intended for transactional or nonrecital capital use.

NOTE 3 If the requirements of 201.12.A.2a are met, it is not required to enter any data in the columns related to TSS, TSS or TIC.

**NOTE 4** If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 1 Data should only be entered at one of the following reasons: 1.1

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TDS, TSS or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

|                             |           |        |
|-----------------------------|-----------|--------|
| measurement uncertainty (%) | $P$       | 25.00% |
|                             | $I_{\mu}$ | 37.14% |
|                             | $\sigma$  | 48.75% |

play accuracy

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

Table 201.103 – Acoustic output reporting table

| Index label                    |                                      | MT                   | Scan | TTS  | TTH | TTC     |
|--------------------------------|--------------------------------------|----------------------|------|------|-----|---------|
| Maximum Index Value            |                                      | 1.6                  | 0.52 | -    | -   | 0.57    |

NOTE 1 Data should only be entered in one of the columns related to TB

NOTE 2 If the information was not provided regarding TBC for any transmission, assume it not intended for transmission or neonatal cephalo cases

NOTE 3 If the requirements of 2011.12.2b are met, it is not required to enter any data in the columns related to TB, TB or TBC

NOTE 4 If the requirements of 2011.12.2b are met, it is not required to enter any data in the columns related to TB

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| IT               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be obtained in case of the columns related to TDS

NOTE 2 Information need not be provided regarding TTD for any "non-scan" array; it is included for transverse or non-scan arrays only

NOTE 3 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TDS, TIB or TTD.

NOTE 4 If the requirements of 201.12.4.3 are met, it is not required to enter any data in the columns related to MT.

NOTE 5 Focal Length is a NOMINAL value

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic use

NOTE 3 If the measurements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TIS or TIC.

| measurement uncertainty (%) |
|-----------------------------|
| $p$                         |
| $I_{\mu}$                   |
| $p_{\sigma}$                |

| Display accuracy |                              |
|------------------|------------------------------|
| M1               | 20% or 0.2, whichever larger |
| T1               | 40% or 0.4, whichever larger |

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |
| $I_d$                       |
| $P_i$                       |

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any transmission assembly not intended for transmission or associated auxiliary uses

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to T15, T23 or T10.

NOTE 4 If the requirements of 201.12.4.2b are

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |

Acoustic output data in accordance with IEC 61157/4.2.2, accompanying literature

ARIETTA 50

S31 Sector

Acoustic power is controllable by the user.

NOTE 1 Data should only be entered in one of the columns related to TIS  
NOTE 2 Information need not be provided regarding TIC for any substances assumed not intended for transworld or national supplies uses  
NOTE 3 If the requirements of 201.12.4.3a are met, it is not required to enter any data in the column related to TIS, TIB or TIC.  
NOTE 4 If the requirements of 201.12.4.3b are met, it is not required to enter any data in the column related to M, TIC or TIB.  
NOTE 5 If the requirements of 201.12.4.3c are met, it is not required to enter any data in the column related to M, TIC or TIB.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any measurement

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter

NOTE 5 Focal Length is a NOMINAL value

Table 201.103 – Acoustic output reporting table

| Index label                  |                                    | MI                   |       | TIS  |       | TIR  |         |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal ophthalmic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TB or TIC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML

NOTE 5. Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_H$                       | 37.14% |
| $B$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| M/I              | 20% or 0.2, whichever larger |
| T/I              | 40% or 0.4, whichever larger |

| Flow Area Lock | Flow Area Lock |
|----------------|----------------|
|----------------|----------------|

NOTE: Data should not be entered in case of the lock area needed to the

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TN or TIC.

NOTE 4 If the requirements of 20.1.2.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |

| Display accuracy |                              |
|------------------|------------------------------|
| M1               | 20% or 0.2, whichever larger |
| T1               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in case of the values related to TDS

NOTE 2 Information need not be provided regarding TTC for any "nonscan" parameter - not intended for transcranial or noncranial applications

NOTE 3 If the requirements of 201.114.2.6 are met, it is not required to enter any data in the column related to TDS, TIB or TTC.

NOTE 4 If the requirements of 201.114.2.6 are met, it is not required to enter data in the columns related to MS.

NOTE 5 If the requirements of 201.114.2.6 are met, it is not required to enter data in the columns related to MS.

**NOTE !** Data should only be entered in one of the columns related to TIS

DISCLAIMER: Information need not be submitted regarding TIC for any transactions assuming not intended for transactional or nontransactional uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TBS or TIC.

NOTE 4. If the requirements of 201.12.4.2b are

NOTE 1 Data should only be entered in one of the columns related to TBS.

NOTE 2: Information need not be provided regarding TIG for any transactions arising not intended for transactional or recurrent cashless uses

**NOTE 2:** Applicants need not be provided regarding TIO for any inconsistent statements; they are not required to enter any data in the columns related to TIS, TBS or TIO.

**NOTE 3:** If the candidates of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TBS or TIO.

NOTE 4 If the requirements of 201, 12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_M$                       | 37.14% |
| $p_v$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MI               | 20% or 0.2, whichever larger |
| TI               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TDS

**NOTE 2:** Information need not be provided regarding TIC for any transaction assuming not intended for transactional or neonatal cephalo uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, THH or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |

NOTE 1 Data should only be provided in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TTC for any measurement summary not intended for transmission or manual capital use

NOTE 3 If the requirements of 20.112.4.20 are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4 If the requirements of 20.112.4.20 are met, it is not required to enter any data in the columns related to MI.

NOTE 1 Data should only be entered in one of the columns related to TIS  
NOTE 2 Information need not be provided regarding TIS for any transducer sensors not intended for transducer or neonatal cephalo use  
NOTE 3 If the requirements of 2011.24.2b are met, it is not required to enter any data in the columns related to TIS, TIB or TIO.  
NOTE 4 If the requirements of 2011.24.2b are met, it is not required to enter any data in the columns related to M.

NOTE 1 Data should only be entered in one of the columns related to TDS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for therapeutic or non-invasive applications

NOTE 3 If the requirements of 201:12.4.2b are met, it is not required to enter any data in the columns related to TIS, TIB or TIC.

NOTE 4 If the requirements of 201:12.4.2b are met, it is not required to enter any data in the column related to ME.

NOTE 1 Data should only be entered in one of the columns related to TSS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses.

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TTS, TTB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to M1.

NOTE: 6 Focal Length is a NOMINAL value

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |

**NOTE 2:** Information used must be verified against FCB for any information concerns not identified for transmission or receipt of complete items.

It is a common mistake to think that the only way to avoid a lawsuit is to avoid any contact with the media. This is not true. In fact, the best way to avoid a lawsuit is to be transparent and honest with the media. If you are involved in a lawsuit, it is important to let the media know about it. This will help to build trust and credibility with the public. If you are not transparent, the media will find out about the lawsuit anyway, and this will damage your reputation. So, if you are involved in a lawsuit, it is best to be open and honest with the media. This will help to protect your reputation and avoid a lawsuit.

NOTE 1 Data should only be entered in one of the columns related to T25  
NOTE 2 Information need not be provided regarding T20 for any resources assumed not intended for transauricular or nasolabial cephalic uses  
NOTE 3 If the requirements of 2011.12.4.2a are met, it is not required to enter any data in the columns related to T25, T26 or T20.  
NOTE 4 If the requirements of 2011.12.4.2a are met, it is not required to enter any data in the columns related to M2, T25 or T20.  
NOTE 5 If the requirements of 2011.12.4.2a are met, it is not required to enter any data in the columns related to M2, T25 or T20.

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |

NOTE 1: Data should only be entered in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TTS for any transducer assembly not intended for transcranial or neonatal applications

NOTE 3: If the requirements of 20112.42b are met, it is not required to enter any data in the column related to TTS, TB or TDC.

NOTE 4: If the requirements of 20112.42b are met, it is not required to enter any data in the column related to MI.

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2: Information need not be provided regarding TIC for any transactions arising or not intended for transactional or nontransactional use.

NOTE 3 If the measurements of 201.12.4.2a are met, it is not required to enter any data in the columns related to T15, T30 or T60.

NOTE 4 If the requirements of 201.12.4.3b are met, it is not required to enter any data in the column related to ME.

NOTE 5 Focal Length is a NOMINAL value

| measurement uncertainty (%) |        |
|-----------------------------|--------|
| $p$                         | 25.00% |
| $I_{\mu}$                   | 37.14% |
| $p_z$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2. Information need not be provided concerning TIO five new transgenic animals *v* not intended for transgenic commercial seedling sales.

NOTE 3. If the recommendations of 2011.2.4.2 are met, it is not required to select any data in the columns related to TTS, TH or TIC.

NOTE 4 If the requirements of 201.17.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |
| 25.00%                      |
| $I_{\mu}$                   |
| 37.14%                      |
| $P_{\sigma}$                |
| 16.75%                      |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TTS, TIB or TTC.

NOTE 4 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{a,s}$                   | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TTC              | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TTS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the columns related to TTS, TIB or TTC.

NOTE 4 If the requirements of 201.12.4.2 are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P$                         | 25.00% |
| $I_{a,s}$                   | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TTC              | 40% or 0.4, whichever larger |

NOTE 1 : Data should not be entered in one of the columns related to TIS

NOTE 2 : Information need not be provided regarding TIS for any measurement; however, not intended for transmittal or resonant capillary wave

NOTE 3 : If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to TIS, TIR or TTC.

NOTE 4 : If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ME.

[illegible]

NOTE 1 Data should only be entered in one of the columns related to T10  
NOTE 2 Information need not be provided regarding T10 if any transverse anatomy not identified for transverse or neonatal cephalic view  
NOTE 3 If the requirements of 2011.12A.2a are met, it is not required to enter any data in the columns related to T10, T18 or T1C.  
NOTE 4 If the requirements of 2011.12A.2b are met, it is not required to enter any data in the columns related to M1.  
NOTE 5 If the requirements of 2011.12A.2c are met, it is not required to enter any data in the columns related to M2.

|                             |        |
|-----------------------------|--------|
| measurement uncertainty (%) |        |
| $P$                         | 25.00% |
| $I_H$                       | 37.14% |
| $n$                         | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TT               | 40% or 0.4, whichever larger |

NOTE 1: Data should only be entered in one of the columns related to TIS

NOTE 2: Information need not be provided regarding TIC for any measurement unless not intended for transmission or manual capture, same

NOTE 3: If the requirements of 20.12.4.2.3 are met, it is not required to enter any data in the columns related to TIS, TIR or TIC.

NOTE 4: If the requirements of 20.12.4.2.3 are met, it is not required to enter any data in the columns related to ME.

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIC for any transducer assembly not intended for transcranial or neonatal cephalic uses

NOTE 3 If the requirements of 201.12.4.2a are met, it is not required to enter any data in the columns related to TIS, TEB or TIO.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to ML.

NOTE 5: Focal Length is a NOMINAL value

| measurement uncertainty (%) |
|-----------------------------|
| $P$                         |
| $I_H$                       |
| $\sigma$                    |

Display accuracy

|    |                              |
|----|------------------------------|
| MI | 20% or 0.2, whichever larger |
| TI | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIS for any transducer assembly not intended for transcranial or neonatal cephalic use

NOTE 3 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P_r$                       | 25.00% |
| $I_{r,s}$                   | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TIB              | 40% or 0.4, whichever larger |

NOTE 1 Data should only be entered in one of the columns related to TIS

NOTE 2 Information need not be provided regarding TIS for any transducer assembly not intended for transcranial or neonatal cephalic use

NOTE 3 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the columns related to TIS, TIB or TTC.

NOTE 4 If the requirements of 201.12.4.2b are met, it is not required to enter any data in the column related to MT.

NOTE 5 Focal Length is a NOMINAL value

| Measurement uncertainty (%) |        |
|-----------------------------|--------|
| $P_r$                       | 25.00% |
| $I_{r,s}$                   | 37.14% |
| $P_r$                       | 18.75% |

| Display accuracy |                              |
|------------------|------------------------------|
| MT               | 20% or 0.2, whichever larger |
| TIB              | 40% or 0.4, whichever larger |
